## Welcome to the 2017 Kenma Australia Catalogue

Where possible, we have provided the most up-to-date information for the latest models at the time of printing. However, the most current information can be obtained from Kenma Australia's website, [www.kenma.com.au](http://www.kenma.com.au).

Kenma Australia is committed to providing excellent service and top quality motorcycle products. We support our dealers and products 100% with the best service in the business. Our goal is to ensure that our products fit properly, are reliable, work as intended and dealers have the support they need to ensure their customers are looked after properly in the rare case when a problem does occur.

We work very closely with our suppliers to ensure most products we supply cannot be privately imported via the internet. You will not see Oggy Knobbs, SBS brake pads or Ventura products come into this country via the back door. This takes a lot of effort but we understand the need for our dealers to maintain margins. Supporting products that support your profitability can only be a good thing. Plus with Australian-made products like Oggy Knobbs being so darn good, why would you sell anything else?

### **KENMA always aims to provide the following services:**

- Prompt delivery - usually overnight to most major areas.
- Steady pricing - our policy is to keep prices stable for the entire calendar year wherever possible.
- Customer support - if one of our customers has a problem, we fix it.
- Reliable inventory - we try to have the latest products in stock and available.

Located in Sydney, our address is 8 Lymoore Avenue, Thornleigh, NSW 2120.

We distribute directly from NSW to NT, QLD, NSW, VIC, WA and SA. We have a distributor in Tasmania.

Serial offenders and who to blame.....

Content....

This year the main offenders are Emma Whitmore and Mick Whithers with support from bit players Trina Hayes and Peter Lucas.

Photo's

Many thanks go to Bill Forsyth for his fantastic images from Goodwood 2015.

Also thanks to Chris Bryson for images from Broadford 2016 and the first 200mph naked bike.

Thanks to Russell Colvin for various images RTR.

# New Products from VENTURA .....

## THE EVO RANGE

Introducing the EVO Sports range consisting of the all new versatile and adjustable EVO-Rack, EVO-40 and EVO-10 packs. The EVO-Rack is sleek as it has no high loop, allowing the pack and rack to better match the lines of any motorcycle it is fitted to. Compatible with all Ventura L-Brackets, EVO features the new adjustable mounting system allowing the EVO-Rack to be mounted in four positions on the same bike, perfectly matching the bike and the rider's preference.

**SEE PAGE 9.**

**EVO-10 - 10L PACK**

**EVO-40 - 40L PACK**

**ER20 EVO-RACK**

## THE BONNEVILLE PANNIER SYSTEM

The Bonneville Pannier Bag is the latest innovation from Ventura and works with the Pannier Support System. The bags are a new soft pannier system that allows for super-quick fitment with a bag that won't flap or rub on your paintwork.

**SEE PAGE 12.**

## UNI KITS WITH UNIVERSAL RACKS AND CARRIERS

**Just when you thought the Ventura luggage system couldn't possibly become more versatile and user-friendly; it did. Here are the innovative new Universal Racks and Carriers from Ventura.**

**The new adjustable Pack-Frame, Evo-Rack and Top-Box Carrier are fully compatible with any motorcycle already fitted with Ventura L-Brackets.**

These new products are ideal for owners of multiple bikes as they adjust to almost any width bike. They feature elbows that bolt to the rack, frame or carrier and then slots into the L-Brackets. These elbows are able to pivot and puts the power in the rider's hands by allowing it to mount forward or back as suits them.

UNI Kits featuring the PF20 are available with the complete range of Ventura bag options.

UNI Kits featuring the ER20 and EV10 and EV40 bags are available.

UNI Top Box Kits feature the VTB1432 Astro 32L box TBR20 carrier.

### SOFT MOTORCYCLE LUGGAGE

Ventura cater for the travelling motorcyclist with several luggage options for a variety of carrying tasks and bike styles. As always, these products are made to high standards of quality, including PVC laminated ballistic fabric or Kodra PVC-reinforced fabric construction for long and durable service life as well as pleasing looks. To find out more visit [kenma.com.au](http://kenma.com.au)

#### Panniers:

Ventura offers a range of throwover panniers that are tidy to look at and function very well, too. You simply throw these bags over your seat and presto, more space. All the panniers feature the usual Ventura quality including super-heavy-duty fabric construction with internally bound seams, YKK zips, and adjustable straps so that you can raise them away from your exhausts. There are also plenty of D-rings for further riding security.

##### Manx Pannier, 26-litre, PB0626

These panniers have a stylish tapered design, feature top loading for easy access, internal pockets, safety reflectors, external slash pockets, carry handles and Velcro straps for height adjustment. They also have polypropylene inserts to maintain shape when empty.

##### Monza Pannier, 42 to 58-litre, PB0658

These expandable panniers are a larger version of the Manx. They have all of the features plus they can be expanded by simply undoing a zip. Neither too large when you don't need the space or too small if you do. Very convenient.

#### OEM Pannier Liners:

Liner bags for OEM panniers and topboxes. They make traveling with panniers just so much better as the pannier liner can be packed more easily than a pannier that splits in half. They are lighter to carry as the cases can be left attached to the bike. It almost goes without saying that these liners will be of the same high quality that all Ventura products are renowned for, including super heavy duty fabric construction with internally bound seams and YKK zips. If your panniers are adjustable for size (EG: certain model BMWs), so are the Ventura liners. Designed to be a perfect fit for your panniers when the liners are packed, they are specific to each pannier type and brand. If your bike is not listed here please contact Kenma as this range of products is constantly expanding.

Part No.	Description
PBL09-1	Top-box liner (BMW Vario pannier system)
PBL09-2	Pannier liner expandable (BMW Vario pannier system)
PBL10-1	Pannier liner ( BMW R1200R,ST,RT & 06 on K1200GT)
PBL10-2	Top-box liner (BMW 28 Ltr suits F800, R1200, K1200GT)
PBL10-3	Pannier liner (Honda ST1300)
PBL10-4	Pannier liner (Triumph Sprint 1050)
PBL10-5	Top-box liner (BMW 49 Ltr suits F800, R1200, K1200GT)
PBL10-6	Pannier liner (Honda VFR1200)
PBL10-7	Pannier liner (Triumph Tiger 1050)
PBL14-02	Pannier liner (Triumph Explorer OEM panniers)
PBL14-03	Pannier liner (BMW R1200RT 14-16 OEM panniers)

## Seat Bags:

These lightweight bags simply attach to your seat. Great for sports bikes carrying small amounts of luggage, they are convenient, easy to use and unobtrusive. The Seti-Moto suits bikes with small pillion seats and the Imola suits bikes with larger pillion seats. The design features a soft panel (or 'bra') that attaches to the seat and is fastened by straps underneath so that it cannot be easily nicked. The seat bag itself locks to the bra by way of heavy duty, quick release clips. Both models have the following features: Super-tough ballistic PVC laminated fabric; reflective side stripes for enhanced visibility and safety; rubber moulded carry handle; quick release buckles for fast fitting and removal; expandable, double zipper openings for easy access, and pull tags on zippers for easy operation while wearing gloves.

**Seti-Moto  
Seat Bag:**  
11 litre  
capacity,  
SB1411

**Imola Seat Bag:**  
14-22 litre capacity,  
SB0622

**Seat Bag Base:**  
Useful if you have two  
or more bikes  
SBB02 fits Imola

## Suction Tank Bags:

Ventura tank bags now use four of the highest quality silicon suction cups available to secure the bag to a petrol tank or cover made of any material be it steel, alloy, carbon or plastic. These suction caps provide an extremely secure method of holding the bag in place. These bags have an additional steering head safety strap and a shoulder strap for ease of transport when used in conjunction with a human, and have an array of useful features listed below. Drag strip tested beyond 230km/h!

- Suction cup design for easy attachment to metal or plastic tanks
- Manufactured from 100% waterproof fabric
- Clear GPS or mobile phone pocket
- External wallet or keys pocket
- Removable, adjustable shoulder strap
- Carry handle
- Closed cell foam padding in the base
- Ventura four flap design, containing a suction cup in each flap
- Pull-tags on all zips that can be used while wearing gloves
- Internal seams bound
- External edges bound with double fold binding

**Suki-Moto  
Tank Bag**  
9-litre capacity,

## **Tough-Rack System:**

The AdVentura Tough-Rack system is very different to the existing Ventura Bike-Pack systems however, the Tough-Racks utilise the existing Ventura Bike-Packs and Monza 42-56 litre Panniers.

The new Tough-Rack systems are designed to handle the extreme conditions and loads dished up by Aussie Adventure tourers. The innovative design features a bolt on Pack-Frame can be positioned vertically or removed all together. The AdVentura Tough-Rack system comes as model specific Rear Carrier and Pannier-Mount assemblies, which can be purchased together with a choice of different packs and soft panniers or as stand alone Tough-Rack only. Ventura are working hard on new models for this new system so as always, check the Kenma website fitment pages for the very latest models and fitments.

The Tough-Rack system is a modular system and can be purchased as just the top/rear rack "REAR CARRIER" (RC##) without the "PANNIER MOUNT" (PM##). You can add the Pannier-Mounts and Pannier bags to the Rear-Carrier now or at anytime in the future.

## VENTURA BIKE-PACK SYSTEM

Ventura motorcycle luggage is famous around the world. No other manufacturer offers the huge range of model-specific fitments and the versatility that Ventura does. Every Bike-Pack system kit is individually engineered for each model. Rest assured that over 30 years of experience manufacturing motorcycle luggage means that there is sound engineering, easy fitment and most importantly, reliability behind your Bike-Pack system. All metalwork is made from sturdy, powder-coated steel and all mounting hardware comes standard. Bike-Pack system design carries the load as close to the centre of the bike as possible. The Bike-Pack system distributes the weight along the bike centre-line, positioning the luggage this way minimises wind resistance whilst maintaining handling and manoeuvrability, either when riding solo with bag facing forwards or riding two-up with the pack facing rearwards.

## Bike-Pack System Kits

There are eight to choose from with various extra accessories that can be added at any time during or after the initial purchase. Designed specifically for each and every model motorcycle in the range, these are not one-size-fits-none kits.

### \*\*\* NEW\*\*\* Evo Bike-Pack System

Introducing the EVO Sports range to the Bike-Pack motorcycle luggage system. Consisting of the all-new versatile and adjustable EVO-Rack, EVO-40 and EVO-10 packs.

The EVO-Rack is sleek as it has no high loop, this means that it better matches the lines of any motorcycle it is fitted to. Compatible with all Ventura L-Brackets, EVO features the new adjustable mounting system allowing the EVO-Rack to be mounted in four positions on the same bike depending on the rider's preference.

The two new packs, the EVO-40 and EVO-10 are designed to specifically fit with the EVO-Rack using a similar pocket fastening system that holds the pack securely.

### EVO-40 Touring kit, \$549.00 RRP

40L capacity. Includes L-Brackets, mounting hardware, EVO-Rack and the **EVO-40, 40 litre Pack**.

EVO packs are made from a durable laminated ballistic fabric to ensure the long life of these quality Ventura packs.

**EV40 pack separately \$239.00 RRP**

### EVO-10 Sport kit, \$399.00 RRP

10L capacity. Includes L-Brackets, mounting hardware, EVO-Rack and the **EVO-10, 10 litre Pack**.

EVO packs are made from a durable laminated ballistic fabric to ensure the long life of these quality Ventura packs.

**EV10 pack separately \$109.00 RRP**

### Aero-Delta Touring kit, \$449.00 RRP

15-35L capacity. Includes L-Brackets, pack-frame, mounting hardware and the **P0635 Aero-Delta 15-35 litre Expanding Pack**. Expands from 15 to 35 litres. Pull-tags on zips makes them easier to operate with gloves on. Bound internal and external seams. Zips together with other packs in the 'Aero' range.

Dimensions: (H x W x D) 440 x 500 x 210 mm.

**Pack separately \$169.00 RRP.**

### Aero-Spada Touring kit, \$479.00 RRP

51L capacity. Includes L-Brackets, mounting hardware, pack-frame and a **P0651 Aero-Spada 51 litre Pack**.

51-litre capacity, built using PVC laminated ballistic fabric. Shoulder straps are standard, includes internal supports to retain shape when empty. Featuring reflective material on all three external pockets plus slash pocket for small items, internal pockets and key clip, moulded carry handle, and quick release buckles.

Dimensions: (H x W x D) 440 x 610 x 390 mm.

**Pack separately \$189.00 RRP.**

# BIKE-PACK SYSTEM

## Rally-Euro Touring kit, \$449.00 RRP

The Rally Euro Bike Pack offers 44 to 56 litre capacity and is designed to suit all new and existing Ventura Bike-Pack systems. Includes L-Brackets, pack-frame, mounting hardware and the **P0656 Rally-Euro 44-56 litre Pack**.

Features reflective stripes, moulded carry handle, quick release buckles for attaching to rack, ballistic heavy duty fabric for main outer shell and pockets, inserts to retain shape, YKK zippers. Dimensions: (H x W x D) 410 x 500 x 310 mm, Expanded: (H x W x D) 460 x 500 x 310 mm.

**Pack seperately \$169.00 RRP.**

## Bora Touring kit, \$489.00 RRP

The Bora Bike-Pack is designed to suit all new and existing Ventura Bike-Pack systems. Like the companion Bike-Pack, the 47 litre Bora is semi-rigid with moulded panels to hold its aerodynamic shape even when empty. Bora and Mistral Bike-packs can be zipped together or to each other for additional capacity if required (Please note: Mistral and Bora Bike-Packs will not zip to existing Aero-packs). The clam shell design offers ease of packing, and great versatility.

**Pack seperately \$199.00 RRP.**

## Mistral Touring kit, \$549.00 RRP

47L capacity. Includes L-Brackets, pack-frame, mounting hardware and the **P1247 Mistral 47 litre Pack**. This pack sets a new standard for soft motorcycle luggage. Manufactured using the very latest thermal moulding techniques in conjunction with hi-tech water-resistant materials and zippers. Mistral Bike-packs can be zipped together for additional capacity if required. (Please note: Mistral Bike-Pack will not zip to existing Aero-packs).

**Pack seperately \$259.00 RRP.**

## Suzuka Touring kit, \$399.00 RRP

35L capacity. Includes L-Brackets, mounting hardware, pack-frame and the **9735 Suzuka 35 litre Pack**. A very affordable pack featuring padded shoulder straps, external pocket, additional D-rings fitted, reflective safety triangles, YKK zippers. Dimensions: (H x W x D) 420 x 400 x 300 mm.

**Pack seperately \$109.00 RRP.**

## Sports Rack kit, \$299.00 RRP

General purpose rack assembly. Includes L-Brackets, mounting hardware and Sports-Rack.

Please note: Sports-Racks are an accessory item and can be added to any touring kit as an extra or purchased seperately at any time.

**Rack only \$90.00 RRP.**

## Parts-kit, \$349.00 RRP

A touring kit without a pack for existing pack owners. Includes L-Brackets, mounting hardware, Pack-Frame.

## ASTRO Top Box kit, \$369.00 RRP

Ventura ASTRO combined with a new special carrier the TBR ensures compatability with all new and existing Ventura Bike-Pack systems. The 32 litre ASTRO Top Box can be easily retro-fitted to any motorcycle already fitted with a Ventura luggage system by purchasing the universal ASTRO-TBR cradle combo.

ASTRO and existing Ventura racks can be swapped over in seconds, and can also be reversed to sit over the pillion seat on many models to improve mass centralisation.

ASTRO Top Boxes are lockable and come with a universal base plate and mounting hardware included. Approximate dimensions 400 x 400 x 340mm.

**ASTRO-TBR Box and carrier combo \$189.00 RRP.**

**ASTRO 32L Top Box seperately \$99.00 RRP**

Reversible on most models

ASTRO-TBR carrier combo

### VENTURA UNIVERSAL RACK & PACK KITS

Just when you thought the Ventura luggage system couldn't possibly become more versatile and user friendly, well it can with the introduction of the Uni Rack & Pack kit from Kenma.

Uni Rack & Pack Kits consist of a Ventura Universal Rack — compatible with any model motorcycle already fitted with Ventura L-Brackets — and your choice of Ventura Bag.

#### EVO-40 40L and ER20 **\*\*NEW\*\***

EVO packs are made from a durable laminated ballistic fabric to ensure the long life of these quality Ventura packs.

**Part # UNIEV40 \$349.00 RRP**

#### EVO-10 10L and ER20 **\*\*NEW\*\***

10 litre capacity. Includes EVO-Rack and the EVO-10, 10 Litre Pack.

EVO packs are made from a durable laminated ballistic fabric to ensure the long life of these quality Ventura packs.

**Part # UNIEV10 \$219.00 RRP**

#### Suzuka 35L and PF20

35 litre capacity. Includes universal rack and Suzuka 35 litre pack. A very affordable pack featuring

padded shoulder straps, external pocket, additional D-rings fitted, reflective safety triangles, YKK zippers.

**Part # UNI9735 \$229.00 RRP**

#### Aero-Delta 15-35L and PF20

Expands from 15 to 35 litres capacity. Includes universal rack and the Aero-Delta Expanding Pack. Pull-tags on zips makes them easier to operate with gloves on. Bound internal and external seams. Zips together with other packs in the 'Aero' range.

**Part # UNI0635 \$279.00 RRP**

#### Aero-Spada 51L and PF20

51 litre capacity. Includes universal rack and the Aero-Spada Pack. Built using PVC laminated ballistic fabric. Shoulder straps are standard, includes internal supports to retain shape when empty. Featuring reflective material on all three external pockets plus slash pocket for small items, internal pockets and key clip, moulded carry handle, and quick release buckles.

**Part # UNI0651 \$299.00 RRP**

#### Rally-Euro 44-56L and PF20

Expands from 44 to 56 litre capacity. Includes universal rack and the Rally-Euro Pack. Features reflective stripes, moulded carry handle, quick release buckles for attaching to rack, ballistic heavy duty fabric for main outer shell and pockets, inserts to retain shape, YKK zippers.

**Part # UNI0656 \$279.00 RRP**

#### Bora 31L and PF20

31 litre capacity. Includes universal rack and the Bora Bike-Pack. Like the companion Mistral Bike-Pack, the Bora Bike-Pack is semi-rigid with moulded panels to hold its aerodynamic shape even when empty. The clam shell design offers ease of packing, and great versatility.

Bora and Mistral Bike-packs can be zipped together or to each other for additional capacity if required. Please note: Mistral and Bora Bike-Packs will not zip to existing Aero-packs.

**Part # UNI1231 \$309.00RRP**

#### Mistral 47L and PF20

47 litre capacity. Includes universal rack and the Mistral Bike-Pack. Like the companion Bora Bike-Pack, the larger Mistral Bike-Pack is semi-rigid with moulded panels to hold its aerodynamic shape even when empty. The clam shell design offers ease of packing, and great versatility.

Bora and Mistral Bike-packs can be zipped together or to each other for additional capacity if required. Please note: Mistral and Bora Bike-Packs will not zip to existing Aero-packs.

**Part # UNI1247 \$379.00 RRP**

# UNI KITS & BONNEVILLE PANNIERS

## BONNEVILLE PANNIER SYSTEM

Many soft luggage systems have straps that hang over seats, can slide down and get caught on exhausts or worse, in the rear wheel. The Bonneville Pannier System from Ventura elegantly makes those hassles a thing of the past.

This system features two large 24 litre bags that slide onto the specially designed racks and in some cases can be used to compliment an existing Bike-Pack System, or as a standalone fitment. The panniers are quick to fit and feature a unique sleeve that ensures the luggage is held firmly in place. Includes mounting brackets and a pair of 24 litre capacity panniers manufactured from high quality Codra fabric. Features: reflective piping; padded carry handles; internal pockets for small items; internal seams bound; fast release buckles for easy removal; and large zip opening for easy access

Dimensions: 430mm x 250mm x 140mm.

**BONNEVILLE Kit (L-Bracket kit required) \$349.00 RRP**

**BONNEVILLE Kit (L-Bracket kit not required) \$399.00 RRP**

**Pannier Bags seperately (requires supports) \$199.00 RRP.**

**The Bonneville Pannier System is currently available for selected models, see Ventura fitments page.**

## VENTURA FACTS. DID YOU KNOW?

- Ventura Bike-pack systems are proudly handmade in New Zealand.
- Bike-Pack kits do not include a Grab-handle.
- Touring-Kits are rated to carry 9kgs weight.
- ASTRO Topbox-Kits are rated to 5kgs weight.
- The Ventura Bike-Pack System (with soft packs) have been tested by independent journalists on a race track at speeds up to 288km/h with no effect on the handling. The journalist's comment was, "I didn't even know it was there."
- Pack-Frames are not all the same size they come in five widths and two different deck heights.
- The Ventura Bike-Pack Systems can not be used as a back rest for the passenger. It is designed as an integrated luggage system, not a back rest.
- Ventura has Bike-Pack Systems available for approximately 1800 different model motorcycles. Some of these go back to the mid '70s. We can make kits for any models to special order, there is a delay but they are available. Check the fitment list next or online to see if your bike is on it.
- Fitting difficulty varies from model to model. With the huge range of different model bikes that we cater for, the design and complexity vary considerably. Some take minutes while others take much longer but all kits are designed specifically for each different model motorcycle. If you read the instructions carefully (THIS IS VERY IMPORTANT) and have an average amount of mechanical ability then you will have no problems.

## VENTURA BIKE-PACK SYSTEM ACCESSORIES AND SPARES

Versatility is a key aspect of the Ventura Bike-Pack System. You can tailor it to suit your needs quickly and easily with the following purpose-designed accessories.

### Sports Rack

Designed for around town and everyday general purpose use, or with Ventura's 10 litre Sports-Pack. The Sports-Rack is included with a **Sports-Rack kit** or can be purchased separately to interchange with the Pack-Frame from your Touring-Kit. It also doubles as a grab rail for your passenger. Refer to the kit fitment list for the correct part number for your bike.

**Black or Chrome, \$90.00 RRP.**

### Grab Handle

When you don't want or need the rack, a Grab Handle should be fitted for looks and safety. The Grab Handle installs in seconds to provide a sturdy hand hold and a neat look when you don't need a rack. Refer to the kit fitment list for the correct part number for your bike.

**Black or Chrome, \$44.00 RRP.**

### 10L Sports-Pack

Designed for Sports-Racks, this new Sports Pack II is a cool little bag is big on design and high quality manufacturing. It has a 10 litre capacity and semi rigid construction and features a zippered internal meshed pocket, carry handle and shoulder strap.

**Black (P1310), \$109.00 RRP**

**Australia's first 200mph Naked Bike...Chris Bryson, Lake Gairdner 2012.**

**Shoulder Straps**

### Shoulder Straps

Designed for use with the Aero-Delta and Rally-Euro touring packs that do not have built-in shoulder straps like the Suzuka and Aero-Spada. Wide, padded and strong, these will make lugging your gear less stressful.

**Black (PS0131), \$25.00 RRP.**

Designed for use with the Bora Bag.

Bora Bag Straps (PS1306), \$35.00 RRP.

### Auxiliary LED Tail Light:

VTL001, \$49.95 RRP

### Storm Covers

Designed to make Ventura touring packs watertight. While all Ventura packs are made from waterproof materials, water can ingress through the zippers. Storm covers are made from super strong parachute material and shaped specifically for each bag.

- For Suzuka.....SC9735
- For Aero-Delta.....SC135
- For Aero-Spada.....SC145
- For Rally-Euro.....SC144
- Dual Aero-Delta packs.....SC135-135
- Dual Aero-Spada packs.....SC145-145
- Aero-Spada/Delta combo.....SC145-135
- For Bora.....SC1231
- For Mistral.....SC1247
- Dual Bora packs.....SC1231-1231
- Dual Mistral packs.....SC1247-1247
- Bora/Mistral combo.....SC1247-1231

Single Storm Cover \$39.00 RRP

Double Storm Cover \$49.00 RRP

### Locking Device:

Replace lost or worn locking devices and keys.

**Locking Nut (Black), LD001, \$9.95 RRP**

**Locking Nut (Chrome), LD001C, \$9.95 RRP**

**Locking Key (Silver only), LK001, \$5.95 RRP**

### L-bracket fitting kits:

Removed your L-brackets and lost the spacers or bolts? Kenma can get pretty much any Ventura part a customer may need, all you have to do is ask.

# VENTURA®

*It's not where you're going...It's how you get there....*

**Luggage,  
Protection,  
Handlebars.**

## VENTURA ROLL-ON/ROLL-OFF BIKE STANDS: \$299.00 RRP

Safely store, display, load and transport motorcycles. One person is all that is required – simply roll the bike on, and roll it off. The stand supports your bike using the wheel and the bike's own weight by employing an over-centre pivot and cradle arrangement that securely locks the wheel in place. These Bike Stands are ideal for maintenance, bike displays and cleaning.

Excellent for transporting bikes as they have four holes to facilitate bolting down to the bed of a trailer, truck or ute.

It makes unloading, loading and tying down a one-person operation (roll bike onto the stand and it will sit there while you strap it down). Three models to accommodate most common front or rear wheel diameters and tyre widths.

Now includes a foot-operated release lever to aid removal of the bike from the stand.

Does your modern bike have a centrestand? Probably not, Ventura Bike-Stands make it easy to keep them upright at a standstill. These beautifully simple and elegant stands make getting your bike into an upright position an absolute breeze. One person is all that is required with one of these stands – simply roll the bike on, and roll it off. Quick, easy and safe. Ventura Bike Stands support your bike using only the wheel and employs a clever over-centre pivot and cradle arrangement that securely locates the wheel.

The stands have mounting holes for bolting down if you so wish. For the workshop or shop owner, these stands will prove to be very handy for bike displays and around the workshop.

Also available is a rear wheel version for those that prefer the bike to be supported by the rear wheel. Only available for 17" wheels in 170 to 200 section or 15" in 170/80 section, this stand is also excellent for showroom duties.

### Fitments:

There are two models of front stand and one rear version to accommodate most common wheel diameters and tyre widths. **Ventura Bike-Stands are all \$299.00 RRP each.**

- **BS009** 16" to 18" Ø wheels with 110 section tyres and up
- **BS010** 18" to 21" Ø wheels with up to 100 section tyres
- **BS011** 17" Ø rear wheels from 170 to 200 section tyres

## LIGHT-GUARDS

You know how expensive spare parts can be for your bike. Why not shell out a bit of cash now as insurance against replacing a headlight later? Ventura Light-Guard headlight protectors will cost you a fraction of the replacement cost for a new headlight. A fraction! Ventura's impact resistant Light-Guards are made from space age Zykalon CS material. They are moulded to maintain the contour of your headlights so they are unobtrusive and utilise Velcro fasteners to hold them in place.

## VENTURA ATV BULL BARS

Protect hard-working ATVs from the sort of damage these vehicles are subject to everyday in the tough rural environment. Be it impact damage or your stock rubbing on the vehicle, even just careless operators, Ventura bull bars will save \$\$\$ lost on repairs, downtime and trade-in value. Ventura ATV bull bars are super-rugged, featuring thick-walled steel tube construction and top quality workmanship. Hot-dip galvanised for an extremely hard-wearing finish and ultra long life.

### Fitments and Part Numbers

The current range of Ventura ATV bull bars is listed in the table adjacent.

**Can-Am BB13G Bull Bar Kit**

**Honda HB31G Bull Bar Kit**

**Suzuki SB23G Bull Bar Kit**

## VENTURA HANDLEBARS

- Ventura manufacture a large range of one-piece handlebars for all manner of bikes.
- Ventura handlebars are fabricated from high quality 12 gauge mild steel or stainless steel tube.
- Double knurling at the triple clamp mounts reduces the possibility of twisting.
- Ventura bars are available Chrome plated or in some type Black and/or Stainless Steel
- Ventura Handlebars come in 7/8" (22mm), 1" (25.4mm) and 1-1/4" (31.75mm) diameters in a huge variety of bends.
- 7/8" suits most Japanese or European motorcycles.
- 1" and 1-1/4" suits Harley-Davidson and customised heavy cruisers.
- 1" bars except HD02 have indents for HD switch gear and all 1-1/4" models accept internal wiring.
- 1-1/4" bars are available with 1" crown (clamp area) or full 1-1/4" crown for later models fitted with 1-1/4" clamps.
- Selected Ventura bars are also notched to accept the current Harley-Davidson "Fly by wire" throttle assy.
- For images of all Ventura handlebars please visit [www.kenma.com.au](http://www.kenma.com.au)

## Handle bar styles.

**2006 Bonneville T100 fitted with Rude Boy (VH17B). Bolt-on 1" handlebar uses stock cables and wiring.**

**For a standard Bonnie with 7/8" bars, choose VH16 Rockster.**

**Coocase Top Boxes provide a durable luggage solution in an elegant, user-friendly design.**

**Luxury models feature LED brakelights, keyless entry via remote, and a theft deterring alarm system, setting the Coocase above and beyond other top boxes.**

**Whether you are cruising the strip, commuting to work, or taking the adventure of a lifetime, Coocase will meet or exceed your expectations. Complete kits with mounting system for over 1000 model bikes are available. See fitments on pages 45 to 53.**

## **WHY COOCASE?**

### **STYLE**

Coocase Top Boxes are totally and completely customizable. Not satisfied with the look of your Coocase Top Box? Both replacement lenses and lid panels are available for purchase! Lenses are available in clear, smoke gray and red. Lid panels are available in red, blue and gun metal.

**Luxury models feature remote control locking**

### **STORAGE STYLE**

Not sure where to stow your helmet when you are not riding? Each Coocase Top Box is capable of holding a full-face helmet, the S48 Astra can hold two! And Coocase's security features will ensure that your helmet will be completely safe.

### **SECURITY**

With Coocase, there's no need to worry that your stuff will be safe. Luxury Top Boxes come integrated with a security shock sensor - if the case is shaken, the alarm activates. A flashing LED security light activates when the case is armed.

Coocase Top Boxes are available on their own and in a kit with universal mounts to be fitted to existing Ventura L-Brackets. See pages 45 to 53.

Coocase provide 12 months factory warranty on all full kits, including metal work.

# Coocase Top Box Range

## THE COOCASE TOP BOX RANGE

Five different model cases are available.

S30SB: 30 litre capacity, fits normal full face helmet.

Wizard Basic: 36 litre capacity, will fit peaked helmet and jacket.

Wizard Luxury: 36 litre capacity, with LED brake lights, alarm and remote locking.

Astra Basic: 48 litre capacity, will fit 2 x XL Shoei full face helmets

Astra Luxury: 48 litre capacity, with LED brake lights, alarm and remote locking.

Wizard and Astra are available in two standard colours: Silver with smoked lens or Black with clear lens.

## advanced air filter engineering

- Increases Performance
- Provides Maximum Filtering
- Long Life Washable & Reusable
- Fuel Saver
- Environment Friendly
- Competition Tested

## Transforming Air into Power!

### POWER IS AN EXPERIENCE THAT IS MEASURED BY THE SMILE ON A RIDER'S FACE!

The DNA dream becomes alive when every throttle twist delivers the amazing feeling of joy and freedom that no dynamometer can measure. It's the experience of pure satisfaction, coming from total harmony of man and machine. This is DNA's human oriented vision, the foundation that supports a solid corporate structure. Each product is a "sealed contract" with every rider, for life, lasting quality and high performance for him, his bike and the environment. But above all, inside every DNA® box lives more than a high performance product: DNA comes with the passion of dedicated motorcycle enthusiasts and the friendly companionship that is so unique among our community. DNA® High Performance Filters are made to transform air into power, the power to smile every time you twist the throttle!

### The DNA® POWER ORIGINS

#### Power by quality you can trust.

We, at DNA®, proudly introduce a filter that can last the life of the vehicle. Strict quality control for construction and materials, chosen only by their highest quality, are some of the factors that allow us to offer a Lifetime Warranty!

#### Power by the best materials for the job.

High performance starts from using the best materials available that meet the high DNA® standards. High tensile strength, high temperature and UV radiation resistance properties are a must for our materials.

#### Power by the best materials for the environment.

We call it "Advanced Environment Friendly Engineering". We use eco-friendly materials, like our 100% organic cotton instead of paper or synthetic foam.

#### Power by design.

Hi-tech, precision CAD design (computer aided design) and CAM (computer aided manufacturing). Revolutionary and unique design solutions like the Full Contour design (FCd) which expands the active filtration area by up to 80%, the factory-glued high quality EVA foam seals, to ensure a correct and secure sealing and easy filter installation, are some of the features that make every DNA® the best air filter money can buy.

#### Power by controlled and unique manufacturing processes.

CNC machining, in-house tooling manufacturing, industrial automation and robotic production systems, combined with our attention to detail and continuous quality control, ensures that each and every DNA® is a product of Advanced Air Filter Engineering.

#### Power by State-Of-Art testing and evaluation methods.

Airbox reverse engineering using Faro & Microscribe 3D arms. CAAFT (computer aided air flow testing). Extensive in-house dyno testing on every single product.

#### Power by performance.

DNA® increased air flow means increased engine power and torque: up to +12 hp increase (common for some applications), resulting in crisp throttle response and better control. Translate this as increased dynamic safety that you will discover from the very first moment that you will use our products.

#### Power by engine protection and efficiency.

Search no more for the best combination of power and protection! DNA® High Performance Air Filters, "trap" all the dust particles that flow towards the filter, even the very fine ones (down to 5 microns), guaranteeing that the only thing that passes the filter is clean, fresh air!

#### The Power of a World Champion.

DNA® lives where ever high performance is a winning element. We have the will, the product, the custom solutions and the experience to excel in the toughest testing environment: motorsports! Inside every DNA® filter breathes a World Champion!

#### Power by non-stop research and innovation.

DNA® is constantly on the move looking for new frontiers, searching and testing new materials and manufacturing processes, to keep efficiency, power and protection at the highest levels, to always be one step ahead: the standard for high performance air filters.

#### Power by being "Green" without any compromise in performance.

Besides the presence of environment friendly materials and the fact that you will never have to throw away our filter, the overall DNA® performance properties, translates to lower emissions and better fuel economy! These are the results of a healthier, cleaner operating engine, under all driving conditions, without forgetting to mention the safety aspects that come with this improved engine performance. Of course all these mean that using a DNA® filter you get more out of your vehicle: Increased power delivery and cost efficient use!

#### Power by being one of you, sharing in the same passion of motorcycles!

We're coming closer to you every day. On a motorcycle – riding our favorite roads, beyond the tar or at racetracks around the world.

## The DNA® High Performance Air Filter in action!

"It's a dirty job, but somebody has to do it!"

Find out how a DNA® High Performance Filter works to protect your engine efficiently, without compromising performance!

### Human "technology" inspiration!

The "technology" that our DNA® filter uses to clean the air is surprisingly common to all of us. It is part of our body; we use it constantly to stay alive! It is part of the human respiratory system that filters the air we inhale! Tiny moistened hairs called cilia protect the nasal passageways and other parts of the respiratory tract, filtering out dust and other particles that enter the nose with the breathed air. The DNA® filtering cotton media is exactly that, millions of tiny fibers that are oiled! This "hairy hybrid" as we call it, is a genius combination of multiple cotton fibers per square millimeter. The Texture and Thread of this unique cotton is a result of intensive research and testing by DNA®'s development engineers. Impregnated with DNA®'s special filter oil, the "hairy hybrid" is transformed into the remarkable DNA® media that provides very high filtering efficiency and extremely high flow rates.

1.0 AIR BOX INTAKE: Dirty and turbulent air enters the filter.

2.0 DNA®'s next generation multilayer cotton gauze, oil impregnated media.

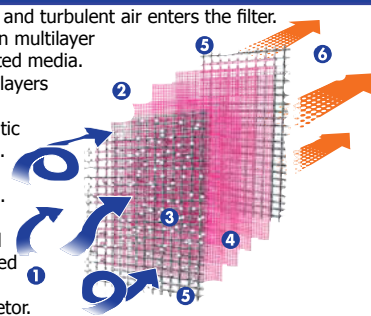

3.0 Dirt trapped at outside layers of the filter.

4.0 Special oil produces static charge to the cotton media.

5.0 Epoxy coated Marine grade aluminum wire mesh.

6.0 ENGINE INTAKE:

High performance achieved by the increased and cleaned smooth air stream entering the throttle body or carburetor.

### Trap "enemies" by static charge!

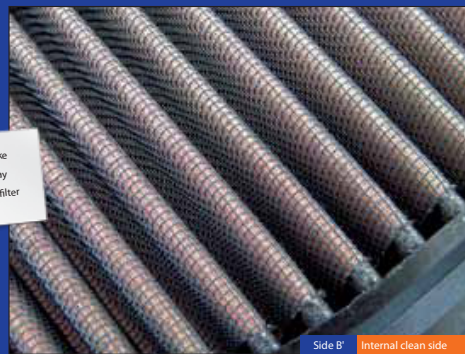

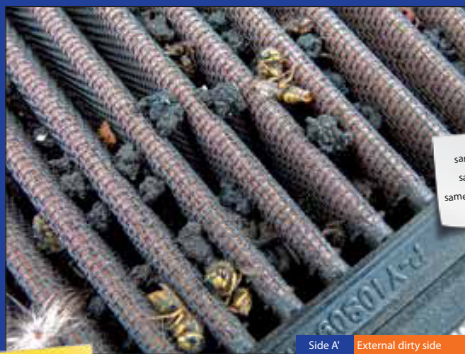

We designed the DNA® filter to acquire a positive static charge as the air passes through the pleated and oiled filter media. This weak static charge very effectively "pulls" on the debris and dust contaminants in the airflow. Remember the experiment in science class at school where the pen rubbed against wool can attract small bits of paper? This is exactly what happens as air flows through the filter. Debris even as small as five microns will change course and stick onto the fibers, even if the "holes" between the fibers were as large as 150 microns! This layer of debris on the fibers will then absorb some oil, get statically charged and becomes part of the filtering media! And guess what; it will start attracting new debris assisting the cotton media in its filtration chore! Finally debris will continue building up on the surface of the filter, as air passes through, until it is totally covered.

### Extreme testing environment.

Our filters have been successfully tested even in the harshest environment during the DAKAR Rally! Through Argentina, up to the Andes, and down to the Atacama Desert in Chile. The dreadful "Fesh- Fesh" (Guadal) fine powder desert sand of the Atacama Desert, was successfully kept out of the race engines, outperforming foam filters while using less filters in total. So the myth is busted, the DNA® filters can successfully be used in any environment. On and off road, in the desert or the outback; DNA® will be there to protect you.

### Here comes increased torque and power.

The DNA® filter will also smooth out the air flow stream as it passes through the filter, reducing turbulence and sending smooth clean and fresh air towards the engine intake, increasing torque and power. In addition to high air flow, smooth and unified air flow is very important and explained when we see a decrease in power output dyno testing a bike or car "without" a filter as the circulation of air in the air box is disturbed and the result is turbulence and low power output.

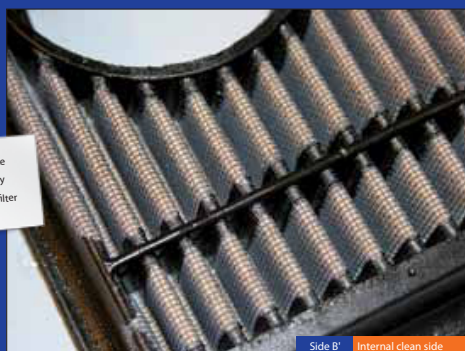

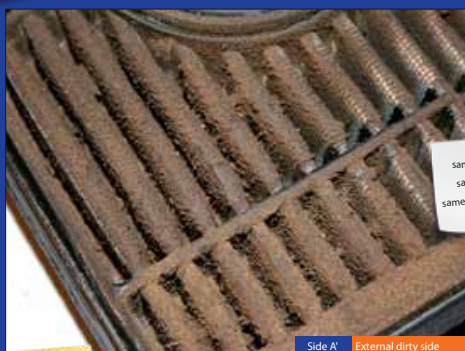

same bike  
same day  
same DNA filter

Side A' External dirty side

Side B' Internal clean side

YAMAHA R1 - Race Bike: This DNA® filter (code P-Y10S09-0R) was used on a race bike for 2,000 km practice and races. Side A' is the dirty side of the filter, full of insects, debris and rubber from the race tires. Side B' is the clean side of the filter, the side towards the intake velocity stacks! Absolutely nothing has passed through the filter! Who says race bikes do not need filters?

same bike  
same day  
same DNA filter

Side A' External dirty side

Side B' Internal clean side

KTM LC8 ADVENTURE 950 - Adventure bike: This DNA® filter (code P-KT9E03-02) was used on a KTM LC8 950 bike for Adventure touring, 60% Off-road and 40% country roads, approximately 15,000km before removing for cleaning. Side A' is the dirty side of the filter, full of debris and off-road dust and sand. Side B' is the clean side, the side towards the carburetor velocity stacks! DNA® is the best choice for Off-road use!

This is what power  
is made of!

## A DNA<sup>®</sup> High Performance Air Filter.

Premium quality, next generation, multi-layer cotton gauze, oil impregnated air filter.

### The Anatomy of a DNA<sup>®</sup> High Performance Filter.

#### 1.0 The DNA<sup>®</sup> Cotton.

This very special cotton is designed by DNA's R&D engineers for High Performance filtering purposes. The basic media is a non-woven surgical cotton gauze with a DNA specific Texture and Thread, with extremely high breaking strength. This unique cotton media is actually a "hairy hybrid" featuring extremely high air flow rates and excellent filtering efficiency that exceeds 98%.

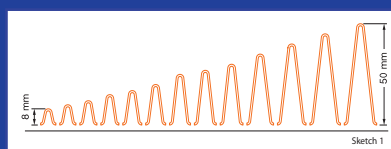

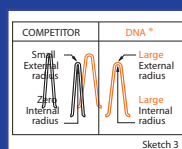

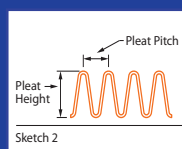

#### 2.0 The DNA<sup>®</sup> Wire Mesh.

The DNA<sup>®</sup> wire mesh is a very special material designed by DNA's R&D engineers. Made out of marine-grade 5000 series aluminium, it features a unique "wrap & fill" and precisely calculated wire diameter, to have the necessary high tensile strength and elasticity to last a lifetime. Additionally it is protected against oxidation by a fine layer of epoxy coating. The DNA<sup>®</sup> wire mesh is designed to perfectly support the cotton layers and at the same time not restrict the air flow.

#### 3.0 The DNA<sup>®</sup> filtering media.

The DNA<sup>®</sup> filtering media consists of four layers of DNA<sup>®</sup> cotton sandwiched between two layers of DNA<sup>®</sup> wire mesh and precisely pleated all together. We produce a very wide selection of media, starting from 8 mm to 50 mm height, with an infinite size of "Pitch". Actually, we can choose from an unlimited combination of DNA<sup>®</sup> filtering media when designing a new filter. Another important feature of our filtering media is the "Large pleat edge radius". This feature allows the edge to be an active part of the filtering media, instead of a "dead" Pleat Pitch inactive area as our competitors is. The result is a unified high air flow. The only drawback of this design is that the pleat height media is very sensitive during production before molding and must be handled with extreme care, increasing the production cost.

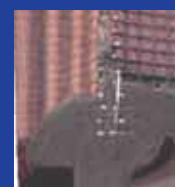

#### 4.0 The DNA<sup>®</sup> air filter oil.

This is an extremely important part of the DNA<sup>®</sup> filter. As soon as the DNA<sup>®</sup> oil is added to the cotton media, the cotton is "static charged" and transformed into an unbeatable filtering material! To achieve this fantastic result we have developed a unique air filter oil formula. The specifications of our DNA<sup>®</sup> air filter oil are as impressive as our filters are. Humidity will not attack the oil, even if the filter is submersed in water. The flow of the filter remains unchanged even under extreme rainy conditions with high humidity. We have seen many competitors' filters transformed into a "milky mess" when it rains, severely reducing the performance of the engine. The oil has low viscosity, plus very high temperature resistance and stability. It will spread uniformly and stay on the filter regardless of the temperature. Additionally, it is UV resistant and easily soluble to assist cleaning the filter.

#### 5.0 The DNA<sup>®</sup> PU (elastomer polyurethane).

The DNA<sup>®</sup> PU is a thixotropic material that we use to manufacture the high quality "frame" of the filter, with unique material specifications. High tensile strength with the necessary hardness for each application, high temperature, fuel and oil resistance, the DNA<sup>®</sup> PU will keep the filtering media in place, it will absorb vibration and last for a lifetime.

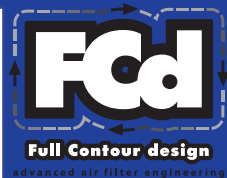

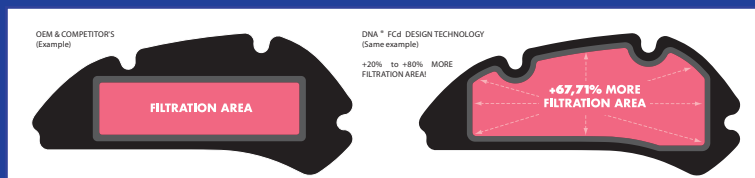

## 6.0 The DNA<sup>®</sup> EVA (Ethylene Vinyl Acetate polymer) closed cell seals.

We use only high quality EVA seals. Precisely cut and factory installed using industrial grade adhesive. This guarantees a perfect airtight seal and trouble free filter installation for the user. The DNA<sup>®</sup> EVA seals and the industrial adhesive are fuel, oil and temperature resistant. Additionally, the DNA<sup>®</sup> cleaner will not affect the EVA seals when the filter is cleaned!

## 7.0 The DNA<sup>®</sup> FCd design technology.

The FCd means that at least 20% and up to 80% more filtration area is common. This unique revolutionary design, an innovation by DNA<sup>®</sup>, allows the pleated filtering media to follow precisely the air box contour, regardless of the complexity of the shape, seriously increasing air flow. FCd takes advantage of the complete footprint of the air box, eliminating "dead spots" that rob power. If the area is there why not use it!!

## DNA<sup>®</sup>: "Air Force"!

The DNA<sup>®</sup> Flow and Dyno Graphs. We test every single filter. Satisfaction guaranteed.

### Air Flow Tests.

For the air flow tests, DNA use the most advanced flow bench available today. The ROTRONICS FlowScan is a totally computerized flow bench that measures: Mass of the air; Flow of the air; Temperature of the air; Absolute air pressure; Differential air pressure; Speed of the air at various points (using pitot tubes); and Absolute humidity of the air. The complete procedure is automated and computer controlled, eliminating human errors.

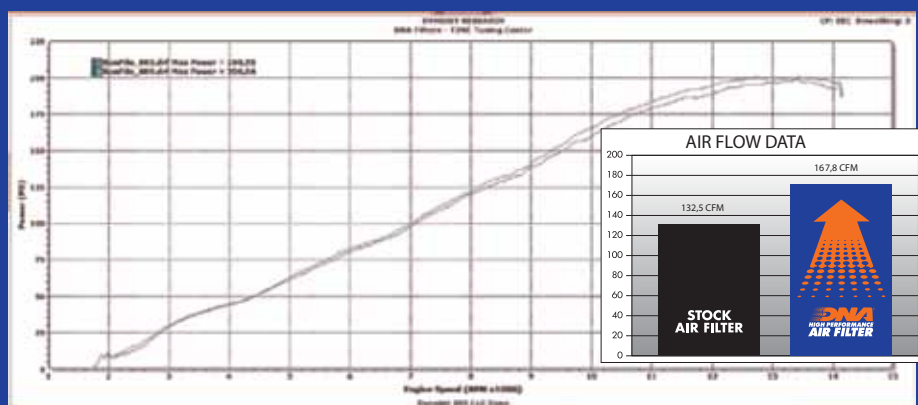

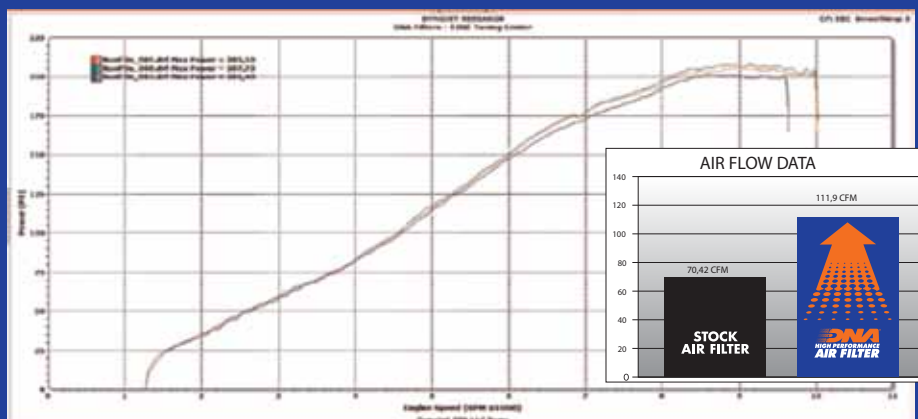

### Dyno Tests.

For the dyno tests, we use the industry standard Dynojet chassis dyno equipped with eddy current load control, Dynojet 250LC. The DNA dyno cell is equipped with a variable flow air cooling system, designed to precisely simulate real world conditions.

### Dyno Graphs.

Below are a couple of examples of Airflow Data and Dyno figures. This data is available on the DNA website for every model filter in the range. Can any other manufacturer offer this range of information on their products?

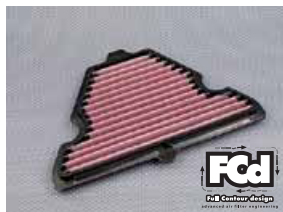

## The DNA® Range of High Performance Air Filters

DNA® Advanced Air Filter Engineering for every application. Panel, round, pod, crankcase; you name it. There's even a range of air filtering solutions for RC models.

**P Series** \*1

Flat Panel air filters designed for the OEM air box.

**R Series** \*1

Round (cylindrical or conical) air filters designed for the OEM air box.

**OV Series** \*2

Oval profile Universal rubber top "Clamp On" filters for motorcycle, automotive, marine and industrial use.

**OVi Series** \*2

Special D shape rubber top "Clamp On" filters developed for custom applications.

**RO Series** \*2

Round profile Universal rubber top "Clamp On" filters for motorcycle, automotive, marine and industrial use.

**XVa Series** \*2

Hexagonal profile Universal "Billet Aluminum CNC machined top" Clamp On filters for motorcycle, automotive, marine and industrial use.

**XVi Series** \*2

Special D shape "Billet Aluminum CNC machined top" Clamp On filters developed for custom applications.

**XVr Series** \*2

Round profile Universal "Billet Aluminum CNC machined top" Clamp On filters for motorcycle, automotive, marine and industrial use.

**XVo Series** \*2

Round profile Universal "Billet Aluminum CNC machined top" Clamp On filters for motorcycle, automotive, marine and industrial use.

**STAGE 2 Series**

The DNA Stage 2 Kit, can be either a DNA filter or a DNA cover that is designed to replace a part of the air box, seriously increasing air flow to the engine. With the proper fuel recalibration the results are always very impressive.

**S3 STAGE 3 Series** \*2

The DNA Stage 3 Kit, consists of a complete air box and filter, designed to replace the existing OEM air box, improve air circulation around the filter and air flow to the engine. Power increase up to 12 hp is common with the S3! The S3 includes all the necessary hardware and installation information.

## DNA....Stuff n That ?

Below: Full Contour Design uses maximum filtration area possible

**Stock Kawasaki ZX636 Airfilter.**

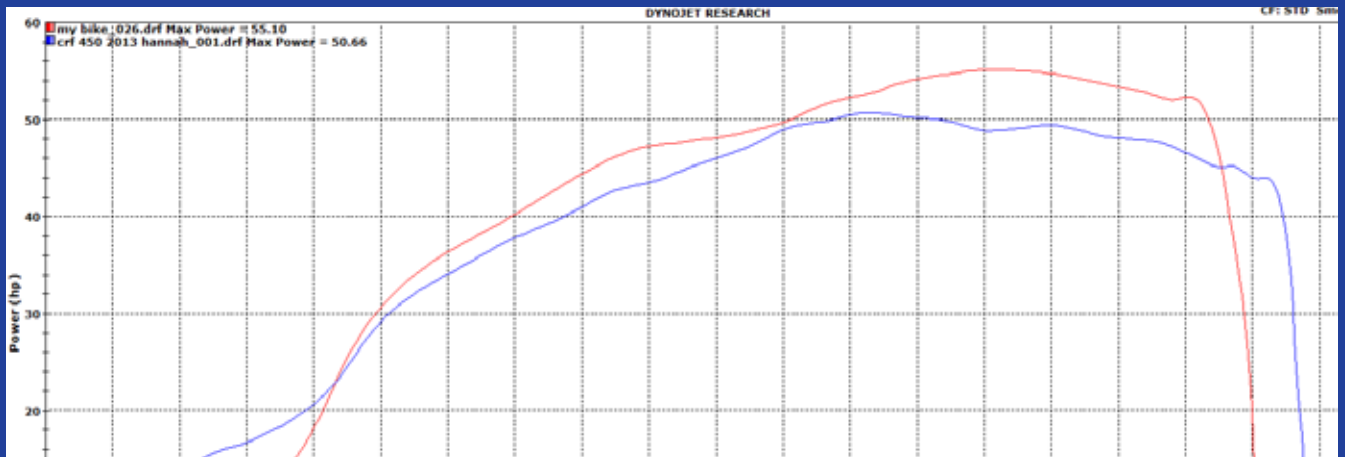

**DNA Kawasaki ZX636 Airfilter.**

**Q: What is a Horsepower worth?**

**Short answer: About \$75.00.**

Long Answer: We took a 2014 CRF450, which already thousands of \$ spent on it, with cylinder head work, high comp piston, full Yoshi system and an Electronic Jet Kit it made 53hp, by simply fitting a DNA air filter it gained over 2hp and even better we found the same 2hp gain when we fitted one to an almost stock 2013 CRF450 and the same result with a 2013 KX250F.

### DIRT BIKES: DNA vs FOAM

Advantages of DNA:  
DNA filters finer dust particles!  
DNA makes more horsepower!  
DNA require cleaning less frequently!  
DNA is easier to clean!  
DNA lasts a lifetime!  
DNA does not mind getting wet!

Advantage of FOAM:  
Foam filters are cheap!

# The DNA<sup>®</sup> Service & Care Products

*Specially formulated Cleaner & Oil, designed by DNA<sup>®</sup>.  
High quality packaging materials for easy application & secure store.  
A perfect product to regenerate your DNA<sup>®</sup> filter.*

## Taking Care of The DNA<sup>®</sup> Filter.

The DNA<sup>®</sup> Air Filter will serve you for many years and will need very little care using the DNA<sup>®</sup> Service Kit. When the filter is dirty, simply follow the instructions that you can find in the service kit, allow the filter to dry, re-oil and you are ready to use your filter again, like new!  
Our service products are "air transport safe", no aerosols included.

PRODUCT	PART No.	USE	CONTENT	INSTRUCTIONS
AIR FILTER SERVICE KIT	DSK-2001	RETAIL / CONSUMER	OIL/BOTTLE 220 ml	Included
			CLEANER/BOTTLE 270 ml	
AIR FILTER OIL	OL-2100	PROFESSIONAL WORK SHOP	BOTTLE 1.100 ml	Included
AIR FILTER CLEANER	CL-2100	PROFESSIONAL WORK SHOP	BOTTLE 1.100 ml	Included

## Frequently Asked Questions

### What is DNA FCd design?

The DNA FCd design is an innovation by DNA. It allows the pleated filtering media to follow precisely the contours of the airbox, regardless of the complexity of the shape. Using the complete footprint of the airbox, we eliminate "dead spots" that rob power and at the same time seriously increase air flow. Using DNA FCd technology, at least 20% and up to 80% more filtration area is common!

### How often do I have to clean my DNA filter?

The servicing intervals depend on the environment where the vehicle is used. Once a year or every 15,000 to 30,000 km is suggested to keep your DNA filter in top condition. An easy way to check if the filter needs cleaning is to see if the wire mesh on the dirty side is visible. If you can see the mesh, you can continue using the filter. If the mesh is totally covered in debris, you must clean the filter.

### Can I use petrol, thinners or compressed air to clean my DNA filter?

Absolutely not! You must treat your DNA filter as delicate textile. How would you clean an expensive and delicate garment? First of all read the cleaning instructions, then follow them carefully. Every DNA filter packaging and the DNA service products include detailed cleaning instructions. The procedure is very user-friendly.

### Can I use the DNA filter un-oiled? Must I always apply oil after cleaning it?

You must never use the DNA filter un-oiled. The oil is a crucial part of the filtering media. You must always apply the Special DNA filter oil, not just any oil, after servicing the filter.

### Does the DNA filter provide the same level of protection as the OEM filter?

Yes and even better, the DNA filters have a filtering efficiency minimum of 98% (ISO 5011 test). Good quality OEM paper filters are from 97% to 99% and the foam filters are from 92% to 97%

### What is filtering efficiency?

Filtering efficiency is the amount of "dirt" the filter can maintain (stop) and protect the engine efficiently. For example, for every 100 grams of dirt that it will receive, the DNA Filter will "trap" 98-99 grams, and this applies even to fine dirt particles as small as five microns.

### What is ISO 5011 filtering efficiency test?

The percentage of dust that the filter retains during a laboratory test, following the ISO 5011 protocol.

### How does DNA measure the airflow and why is this data useful for me, the end user?

DNA uses the most advanced computerized ROTRONICS flowbench available today. The complete procedure is computer controlled and automated to avoid human error. Additionally, we always test the DNA filters back to back, the same day and time, with the stock OEM filters and publish the results. Reading our data, you can immediately see the differences in air flow between the two filters and what to expect by using the DNA filter.

### Other performance filters manufacturers claim air flow data much higher than DNA for the same model, is it possible? I also tried to find the stock OEM filter flow data from them to compare, with no success. Can I use the DNA data?

This challenge was brought to our attention, so we purchased the competition brand filters and tested them back to back against our DNA and the stock OEM filters. Well guess what, the data claimed was always false, the figures had nothing to do with reality! Yes the competition flow figures were higher than the stock filter but still much lower compared to the DNA! No wonder they never compare it with the stock filters, as they can't claim 300% (!) increase in air flow over the stock OEM filter. Only data measured back to back at the same time is comparable, don't forget we are measuring air. This is why we always publish the stock OEM data.

### Can I change my OEM filter with a DNA without changing fueling?

All the latest fuel injected bikes and cars will benefit from the extra air flow and self-adjust, so you can use it straight away. In models where air flow of the DNA Filter is extremely high we include special instructions with the filter.

### I have heard that only the foam filters are good for Off-Road use not the cotton ones. Can I use the DNA filter for Off-Road use?

DNA has developed a unique filtering media that is perfect for off-road use. During the toughest rally in the world, DAKAR 2011 in Argentina - Chile, one of the factory Aprilia 450 Rally bikes, was racing with DNA filter. The results were very impressive compared to the rest of the team's bikes racing with foam filters. Every evening when the bikes were serviced, the DNA filter and the foam filters were compared back to back, absolutely no dust had passed through the DNA filter and the engine was like new! Not to mention that one filter was enough for each day, compared to two or three foam filters per day the other bikes had to use. So this myth is busted!

### I have a race bike. Do I need to use a filter and if yes, why DNA?

Race bikes must always be kept in top condition, especially the engine. Debris and flying bugs found at the track, plus rubber from the bikes' tyres in front, can seriously damage the engine. DNA will provide the maximum air flow and at the same time maximum protection. We do not compromise filtering efficiency in order to increase flow; we increase air flow using our revolutionary FCd design, maintaining the four layer reliable DNA filtering media. If you want the highest air flow along with filtering efficiency of 98%+ to protect your expensive race engine, then your only choice is DNA.

## Race-proven quality brake discs at a fraction of the price.

Founded in 1969, NG Brake Disc has acquired a vast amount of technological expertise in the manufacturing of high-quality product as well as in the designing of new products, quality control and efficient distribution. By keeping every facet in-house, NG maintains the necessary vigilance to ensure the high quality of the products is strictly maintained.

NG Brake Disc is a company run by enthusiastic people with huge experience in the field of high performance brake discs. NG manufacture high quality discs for all motorcycles, mopeds, quads and bicycles. Using the highest quality European steel and the latest machinery ensures NG products are at the forefront of current high performance braking systems in both quality and performance.

NG Brake Disc manufactures OEM-quality brake rotors for all sports, touring, dual-sport, motocross, enduro and commuter bikes plus ATVs and scooters. Many models have several options including a change from solid to floating rotors, as well as wave patterns.

Oversize rotor kits (which include the appropriate caliper relocation bracket) are available for many off-road and motard models in a choice of 270mm or 320mm diameter.

NG Brake Disc replacement brake rotors are known to resolve problems in many models such as GTR1400 or R1200GS. NG R1200 rotors are supplied with buttons to allow fitment on 2009 and later models.

NG have multi-fit discs for scooters, meaning reduced dealer inventory. NG Brake Disc manufacture and supply disc rotors for 22 motorcycle manufacturers. Think Kenma and NG Brake Disc for quality TUV-approved brake discs that will out perform and last better than OEM discs.

# CHOOSE YOUR BRAKE PAD

The right choice for your motorcycle and your riding style.

1. Choose your motorcycle type "Street Motorcycles", "American Motorcycles", "Scooter", "Road Racing", "Off Road", "ATV".
2. Find your "Type of use" in the matching diagram.
3. Pick the compound matching your needs and requirements.
4. Go to the "Motorcycle Model Applications" section to find your bike and matching SBS brake pad numbers.

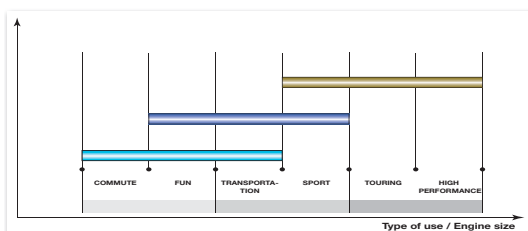

## STREET MOTORCYCLES

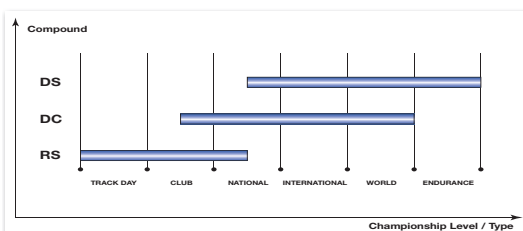

## AMERICAN MOTORCYCLES

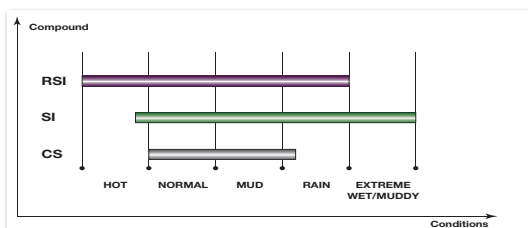

## SCOOTER

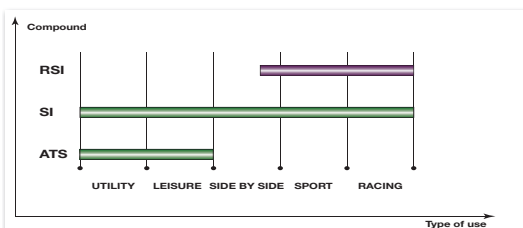

## ROAD RACING

## OFF ROAD

## ATV

# SBS = Bendix compound names and info.

## **DS = MSR (Sinter Matrix, Road Race)**

- Application environment: For Road Race use EXCLUSIVELY. Road Racing and Endurance.
- No thermal bedding-in or brake fade due to new sintering technology
- Very high initial bite, Very high friction level and linear brake performance
- Very high thermal stability, Consistent brake performance and brake lever position
- Extremely low pad wear, Available for majority of new Superstock, Supersport and Racing brake calipers
- Recommended for top level World Championship and Endurance road racing.

## **DC = MCR (Carbon Matrix, Road Race)**

- Application environment: For Road Race use EXCLUSIVELY. Road Racing and Endurance.
- Superb performance, especially when high thermal stability is required.
- Note: Transfer film technology. Always read bedding-in procedures before use.
- Suits heavy braking and tight tracks where high heat levels allow for optimum performance

## **RS = MRR (Sintered, Road Race)**

- Application environment: For Road Race and Ride day (front) use.
- Superb performance in all conditions with very high initial bite.
- Disc-friendly. Good wear rates for this type of application.

## **HS = MF, LS = MR (Sintered, Street)**

- Application environment: High Performance Street use. Excellent performance in all conditions.
- Very high friction level for front (MF) and medium friction level for rear (MR) for best brake balance. Disc-friendly, whether stainless steel or cast iron. Good wear rates.

## **SI = MO (Sintered, Off-Road)**

- Application environment: Standard MX/ATV (front/rear) use. Excellent wear rates, even in wet/muddy.
- Very good performance at low, medium to high temperatures.

## **RSI = MOR (Sintered, Off-Road Racing)**

- Application environment: High performance (Racing) MX/ATV (front/rear) use.
- Excellent performance in the toughest racing conditions. Disc-friendly. Good wear rates.

## **ATS = MOA (Sintered, ATV)**

- Application environment: Standard ATV (front/rear) use, especially for non-stainless steel discs (e.g. Polaris).
- Very good performance at low, medium to high temperatures. Excellent wear rates.

## **HF = MA (Organic)**

- Application environment: Standard Street/Touring (front/rear) use.
- Disc-friendly, whether cast iron or stainless steel. Excellent wear rates. Approved according to ECE regulation.

**KTM'S Angus Reekie and his 1290 Super Duke love SBS Dual Sinter Matrix**  
(exact same compound Carlos Checa won the 2011 SBK World Championship with, and your customers can buy them.)

## KENMA IMPORTS THE ENTIRE VENHILL MOTORCYCLE HOSE AND CABLE RANGE.

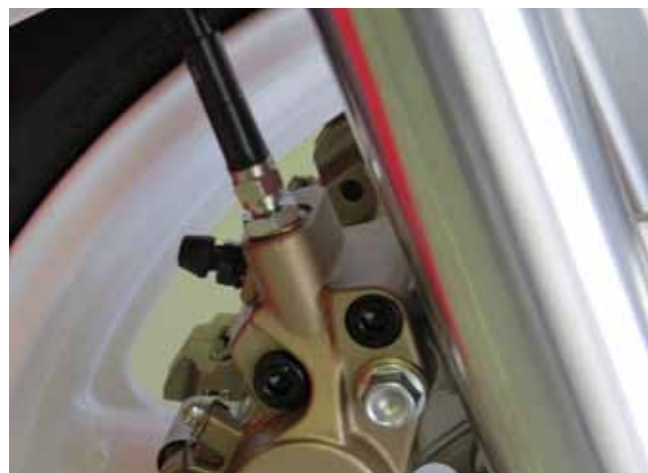

For 40 years, Venhill Engineering UK has been making cables and hydraulic brake lines for motorbikes, ATVs, cars, and karts alongside cables and lines for various industries, healthcare and many other applications. Venhill manufacture ADR-approved braided hydraulic brake hoses, low-friction clutch and throttle cables as dedicated model specific kits, as well as custom lengths and for special applications. Venhill support top level UK race teams including Swan Honda BSB, Cosworth Yamaha in Motocross Grand Prix, and multiple World Speedway Champion Jason Crump. Kenma support many local race teams in particular almost all the front running Period 5 historic racers like Shawn Giles, Steve Martin, Cam Donald, Micheal Dibb and Robbie Phillis. Kenma can now supply Venhill brake hoses and control cables for off road, classic and modern road bikes.

**With over 8000 line items on file please ensure your rep has included the latest Venhill catalogue in your Kenma folder. As much as we'd like to, we cannot list them all here, however, below is a basic breakdown of the Venhill range.**

- **Powerhose Plus ADR-legal brake hose kits for all road and race bikes with hydraulic brake systems.**
- **Powerhose Plus hoses and fittings for custom applications.**
- **Control cables for Classic and Off Road motorcycles.**
- **Powerhose Plus brakes hoses for Off Road motorcycles.**
- **Universal control cable kits for throttle and clutch.**
- **"Master Dealer" control cable and Powerhose Plus kits.**
- **Control cable components (inner, outer, adjusters and fittings).**

Venhill Powerhose Plus braided brake and clutch lines are just about unbeatable for custom, race and oem replacements. Built to exceed ADR, DOT and TUV requirements, every line is factory pressure tested during the manufacturing process. Powerhose Plus brake lines features smooth bore DuPont Teflon inner tubing, the highest quality available (brands using nylon inner should not be considered). The outer is marine-grade stainless braiding with a clear or coloured pcv outer protective cover. The Powerhose Plus system with unique 303 stainless steel swivel unions make this the most versatile ADR-compliant braided brake hose currently available. Venhill Powerhose Plus can be ordered in model specific kits to suit thousands of different motorcycles or as a one-off hose kit to suit any requirement. For custom applications, simply measure how long your hose needs to be then select the right fittings to suit and fit them with perfect, twist-free alignment.

## VENHILL ALL-BLACK POWERHOSE PLUS

Now available in stealthy All-Black, it doesn't get any better than ADR-approved Powerhose Plus braided brake hoses for restoration and custom bike building.

Factory tested to 1500psi, they are available in set-lengths at 25mm increments with smooth bore Teflon inner for maximum durability and heat resistance, as well as marine grade stainless steel outer to control expansion for superior feel and power.

Powerhose Plus braided brake hoses feature unique 360 degree swivel unions to guarantee perfect fit and twist free alignment every time.

Performance plus the discreet all-black appearance make Venhill All-Black Powerhose Plus braided brake lines a winner.

## OFF ROAD CONTROL CABLES AND HOSES.

Venhill have a wide range of Off Road Control Cables and Hoses available. Off-Road Brake Lines have rigid sections for fork leg mounting, swivel unions at end fittings for perfect fitment, and are available in a range of colours. Off-Road Cables have been developed from OEM cables, so they are a performance upgrade giving far better durability, control and feel.

As a guide use pricing below, some standard options also available.

- Front Brake Powerhose Plus \$129.00 RRP
- Rear Brake Powerhose Plus \$89.00 RRP
- Clutch Cables Featherlight \$64.00 RRP
- Throttle Cables Featherlight \$50.00 RRP

For fitments and part numbers please refer to your Venhill catalogue.

## POWERHOSE PLUS MASTER DEALER KITS

Powerhose Plus is also available as a Master Dealer kit.

Venhill master dealers can now make up ADR-approved Powerhose Plus kits on the spot to suit over 95% of motorcycles.

The kits are easy to use: simply select the hose length(s) required; select fittings to suit; bolt together and fit to the bike. It couldn't be simpler.

The Powerhose Plus Master Dealer kit consists of a selection of hose lengths (pre-manufactured with swivel unions at each end), fittings, banjo bolts, and copper washers for use on all brake and clutch lines.

All the brake lines included in this kit are manufactured and individually tested in Venhill's UK factory.

## ROAD BRAKE LINE KITS.

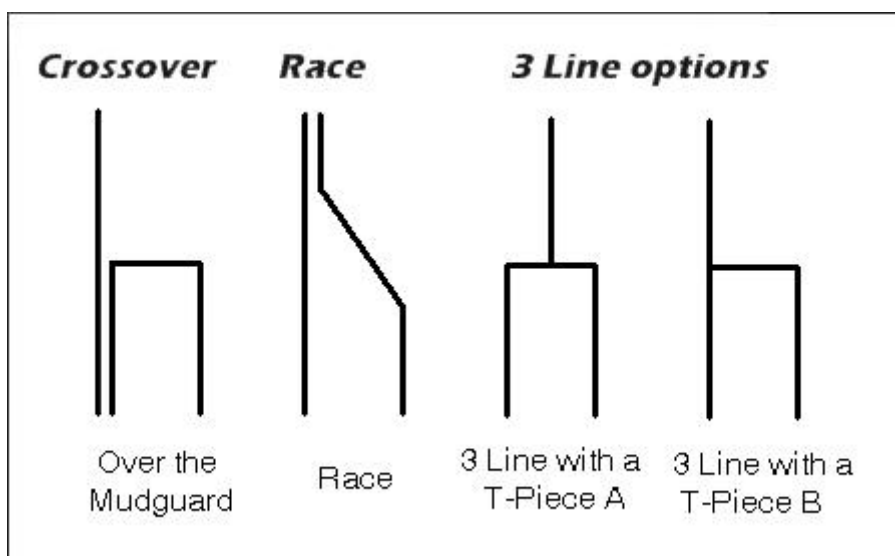

Brake lines are one of your bike's most important components. They transmit braking force directly to the brake calipers and discs. Even a slight loss of pressure through standard, flexible rubber hoses means reduced braking force, feedback and service life.

Venhill have a wide range of Road Hydraulic Brake Line Kits available.

- Two line race style set up for the front is \$149.00 RRP.
- Single rear brake line is \$79.00 RRP
- Other configurations available at \$79.00 RRP per line with either chrome or black fittings (stainless steel fittings are extra).
- Choose from a range of colours: Silver, Carbon, Black, White, Red, Green, Blue, Orange, Yellow, Purple, or Translucent Blue.

**For fitments and part numbers please refer to your Venhill catalogue.**

PLEASE NOTE: If you need a non-standard fitment or your bike is not listed in the catalogue, we have an extensive range of brake lines and fittings available to suit your application. Call us and we will help you to find a resolution and make your customer happy.

## POWERHOSE PLUS CUSTOM HOSES AND FITTINGS

If your bike is not listed, modified from standard, or you just need ADR-approved braided brake lines for a special/custom application choose Powerhose Plus. Venhill take the hassle out of brake hose replacement for the dealer and the user. Nothing could be simpler or faster.

1. Measure existing brake hoses (as per diagram below), and identify your requirements.
2. Select the appropriate lines and fittings from the Powerhose Plus range.
3. Fit to your machine.

When calculating the dimensions of a replacement or custom brake line –measure from the centre of the banjo at one end of the hose to the centre of the banjo at the opposite end of the hose. This gives the overall length of the hose including fittings. To calculate the length of the Venhill hose deduct 40mm from the overall length to allow for the fittings. Then select the appropriate colour hose from the lengths available in 25mm increments.

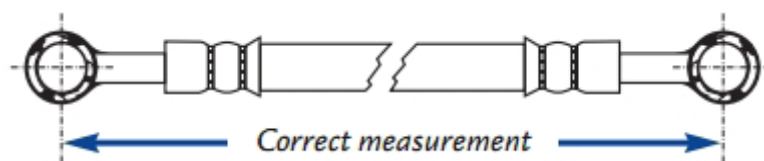

Finish your new hose with the correct fittings from our wide range of genuine Venhill parts and accessories.

When connected, brake lines should have an amount of “free play”; they must not be strained or placed under tension.

**WARNING:** Do not use a hose with a shorter measurement than the original.

Powerhose Plus braided brake lines are available in a range of colours with chrome ends. Hose colours are silver, carbon, black, white, red, green, blue, orange, yellow, purple, and translucent blue. Also available are All-Black Lines with black ends.

Line lengths available are as below:

PART #	LENGTH	PART #	LENGTH	PART #	LENGTH
3H0100	100mm	3H0550	550mm	3H1075	1075mm

3H0525	525mm	3H1050	1050mm	3H1725	1725mm

PLEASE NOTE: Powerhose Plus components are available in chrome, black and stainless steel.

Powerhose Plus Components available include: banjos and banjo bolts, adaptors, connectors, banjo bolt with brake switches, dry break fittings, and Harley fittings.

For a full range of Venhill lines and components, please refer to your Venhill catalogue or follow the links from [www.kenma.com.au](http://www.kenma.com.au)

## VENHILL BEST SELLERS AT A GLANCE

Here's a variety of fast moving Venhill products you may have overlooked in the past.

### Venhill Universal Clutch and Throttle Cables.

Custom bike builders should consider Venhill universal throttle and clutch cables. Cable kits containing various fittings that are suitable for almost any custom or replacement cable up to 1300mm in length.

The flatwound steel outer conduit gives greater strength and durability, whilst the 'bird caging' process allows solder to fully penetrate the weave of the Featherlite control cable making the bond with the nipple much stronger.

Available with black, silver and even braided outers to suit clutch or throttle applications. Keep your customers happy with on-the-spot solutions for those Friday afternoon problems that we've all experienced.

#### UNIVERSAL FAST ACTION TWISTGRIP CONVERSION

Fast action push/pull throttle conversion, Supplied with opening and closing throttle cables.

Includes two interchangeable rotors for the nylon throttle tube.

- Standard rotor pulls 36mm in 90° of rotation

- Faster rotor pulls 36mm in 80° of rotation

Please note: Electric kill or start switches not included.

**Part # U01-4-888, \$214.50 RRP**

#### FAST ACTION TWISTGRIP CONVERSION

Venhill 600A pull-only throttle and universal cable kit. The cable must be cut to length and appropriate fittings used to complete the cable. Supplied with a range of fittings for converting existing throttle cables and twistgrip to 600A. 6mm x 8mm Barrel nipple (BN608) is soldered onto one end of inner wires to fit into the 600A twist grip rotors.

**Part # U01-4-600A, \$148.50 RRP**

#### UNIVERSAL THROTTLE CABLE KIT

High quality universal throttle cable kit includes 1350mm of standard black conduit with Teflon liner, 1600mm of inner wire and selection of fittings. One end of the inner fitted with a carburettor nipple (EE7). The other end will need to be cut to length and the required nipple soldered in place. The ferrules and adjusters are a snug fit on the conduit. They can be bonded in place during the assembly or use a centre punch to make a small indentation in their side. The fittings can be adapted for a range of models. Basic soldering kit is needed to solder the nipples.

**Part # U01-4-100, \$26.00 RRP**

#### UNIVERSAL CLUTCH CABLE KIT

Supplied with Teflon (PTFE) lined conduit with a PVC cover (available in a range of colours) and 2mm O.D. galvanised inner wire strand. A selection of common nipples and high quality fittings are included. One end of the inner wire is fitted with a cast barrel nipple nominally 6mm dia x 10mm. The diameter can be increased using the Nylon sleeves to achieve 8mm and 10mm O.D. The other end of the wire will need to be cut to length and the required nipple soldered in place. The ferrules and adjusters are a snug fit on the conduit. They can be bonded/glued in place during the assembly or use a centre punch to make a small indentation in their side. The fittings can be adapted for a range of models. You will need a basic soldering kit to solder the nipples in place.

**Part # U01-1-100, \$36.00 RRP**

## UNIVERSAL THROTTLE CABLE WITH JUNCTION BOX -- One into two

Universal throttle cable kit with junction box. The kit comprises of one cable entering a junction box slider which is then connected to two separate cables. The cable kit supplied should be finished off as required. You will need to select the appropriate fittings to finish the three ends of the cables. A variety of fittings are supplied to suit most applications. Black PVC outer cover.

Junction box stroke: 33mm

Single (top cable) Inner: 1.75M Outer: 1.5M

Twin (lower cables) Inner: 0.75M Outer: 0.5M

**Part # U01-4-125, \$72.00 RRP**

## UNIVERSAL TWIN THROTTLE CABLE KIT

High quality push/pull universal throttle cable kit to suit a wide range of carburettors and throttle bodies.

Kit includes two 1350mm standard black outers with Teflon liner, two 2000mm lengths of inner wire, and a selection of fittings. One end of both inner wires is fitted with a 6mm O.D. x 5mm barrel nipple. The other ends will need to be cut to length and the required nipples soldered in place. The ferrules and adjusters are a snug fit on the conduit. They can be bonded in place during the assembly or use a centre punch to make a small indentation in their side. The fittings can be adapted for a range of models.

Basic soldering kit is needed to solder the nipples in place.

**Part # U01-4-150, \$72.00 RRP**

## VENHILL TOOLS

### VAMPIRE VACUUM PUMP BRAKE BLEEDING KIT

Strong metal body. Simple quick and efficient single-handed brake and clutch bleeding.

**Part # VWK011, \$ 224.00 RRP**

### CABLE INNER WIRE BIRD CAGING TOOL

Tool for forming a 'birdcage' when soldering nipples to control cable inner wires. Suitable for 1.5mm, 2mm and 2.5mm dia. wire. You will need a vice to hold the jaws and clamp the cable. Then use a hammer to stamp the supplied punch to form the 'birdcage'.

**Part # VT13, \$264.00 RRP**

### TOOL BOX

Handy tool box with removable clear boxes on top and two trays within. A strong and organised way of storing and carrying your tools.

Dimensions:

Length: 440mm

Width: 235mm

Height: 205mm

**Part # VT12, \$80.00 RRP**

# OggyKnobbs

## A U S T R A L I A

### protect your investment

#### OGGY KNOBBS ARE THE BEST PROTECTION FOR YOUR INVESTMENT

In the fight against crash damage, Oggy Knobbs can take the hits. Instead of your expensive motorcycle components self-destructing against the road surface, Oggy Knobbs and Axle Oggys help reduce damage by taking the brunt of crash impact and road surface abrasion. These products can significantly reduce the repair bill after a fall.

Oggy Knobbs take design and quality very seriously. Only the strongest, most resilient materials are used to ensure strength and performance. State of the art manufacturing techniques like CNC machining, laser cutting and MIG welding are used in the production process for accuracy and perfect fit. The brackets are made from high tensile steel alloy for great strength and minimal weight; aluminium components are made from aircraft grade 7075 T6511; the bolts are de-embrittled high tensile items, zinc plated and clear chromated; and the 'plastic' used in the sliders is Acetal for abrasion resistance, impact absorption and strength. All components are treated for corrosion resistance and durability as well as a pleasing appearance.

Some points requiring careful consideration during the design process are based on factors such as chassis design (Is the frame design and construction conducive to using Oggy Knobbs?); the location points on the bike (Will these be strong enough to take the force of a crash impact without bending the rest of the bike or breaking the cylinder head or some other component?); and is there bodywork involved (Will owners want to modify their fairings or can a version with brackets be designed to avoid any modifications?).

What will Oggy Knobbs save in a crash? If they can save the fuel tank and radiator (where applicable) then it is worth saving. Further protection to bodywork and other components is a bonus. Not every bike model can accept Oggy Knobbs. Refer to the fitment tables on the following pages for info on your model.

Most Oggy Knobbs kits are designed to fit without any fairing modifications (referred to as 'no cut'), whereas most other brands require cutting into the fairing. Some bikes may have both a 'cut' and a 'no cut' option. The 'cut' option will be cheaper and lighter and is best suited to racing use where cutting fairings is of lesser importance.

Be diligent, get your Oggy Knobbs now and protect your investment. They will only cost you a fraction of the average repair bill.

#### ADDITIONAL PROTECTION FOR BRAKES, FORKS AND SWINGARMS

For the best possible protection against crash damage always consider Axle Oggys! Axle Oggys mount through the [hollow] axle for greatest strength and use an exclusive fastening system where you only need one tool to install or remove them.

What will Axle Oggys save in a crash? Due to the nature of motorcycle accidents we cannot be 100% certain that they will prevent every type of damage but we can be 100% sure that we have many very happy customers who have er... 'used' their Oggy products and saved lots of dollars.

Swingarm, rims, forks and brake calipers, are both vulnerable and expensive to replace. With Axle Oggys only \$99.00 RRP for each axle, it really is inexpensive insurance.

These are model-specific fitments that have all components machined specially for perfect fit, best performance and aesthetics. Not every model of bike can accept Axle Oggys. Refer to the fitment tables overleaf for your model.

#### Spare Parts

While "using" Oggy Knobbs is best avoided, if the worst does happen and replacement parts are required, spares are always readily available. Unlike many of our competitors including OEM, Oggy parts are easy to get and Kenma keep the most common items in stock. The parts list is too large to list so always call Kenma for P&A if required. Oggy Knobbs are mostly different from model to model and even left to right on many fitments. Spare Knobbs will come with a new bolt and spacer (if they need one). LH and RH Bracket assembly will include a new Knobb as well.

## PICK UP PROTECTORS AND STAND PICK UPS

Designed to protect your investment, the new Pick Up Protectors, or PUPs as we've nicknamed them, are race stand pick ups from OGGY with built in protection KNOBBS.

These should be used in conjunction with Oggy Knobbs and are fitted in place of traditional race stand pick up bobbins. The PUPs screw into threaded holes that most manufacturers provide in swingarms for just this purpose.

Suitable only for models with threaded swingarms please check the list below and contact your dealer about Axle Oggys if your model does not have threads in the arm, eg: single-sided swibgarms.

Also available from Oggy are traditional Swingarm Pick Up bobbins, or as we've shortened it SPU. There are also Low Profile Swingarm Pick Ups, you guessed it, LP SPU.

Made in Australia using only the highest quality materials you can rest easy knowing you have purchased the best possible protection for your motorcycle.

The thread diameter varies from manufacturer to manufacturer so choose carefully.

- 6mm, 8mm, 10mm, 12mm sizes  
(note LP SPU are only available in 6mm and 8mm)
- 6 colours to choose from Black, Silver, Green, Red, Blue & Gold
- Hi abrasion resistance and impact absorbing Actetal
- 7000 series anodised pick up location spacer
- 12.9 tensile bolts tensile bolts

#### PRICING

<b>PUP</b>	<b>Pick Up Protectors</b>	<b>\$44.95 RRP</b>
<b>SPU</b>	<b>Swingarm Pick Ups</b>	<b>\$29.95 RRP</b>
<b>LP SPU</b>	<b>Low Profile Swingarm Pick Ups</b>	<b>\$35.00 RRP</b>

## FENDER ELIMINATORS

Manufactured in Australia with the same quality materials and attention to detail we have all come to expect from the people at Oggy Knobbs.

The range of Oggy Fender Eliminator kits come with bracketry to suit both the original and/or aftermarket indicators.

They are designed for use with the OEM licence plate lamp and Australian number plates (with the exception of S.A. and N.T. which will be available upon request).

These are truly a plug and play fitment, without the need to cut wires or drill holes. This means that your bike can be easily returned to original condition. They are completely legal when fitted using the OEM lamps.

Comprehensive fitting instructions are included.

Available now for a select range of models, we expect Oggy Fender Eliminator kits for other models very soon.

## OGGY BILLET REARSET BRACKETS

Want the racer crouch for better body positioning and weight distribution on your Yamaha R3 or MT03? Australian-made Oggy Billet Rearset Brackets are available in an extremely durable anodised black or silver finish.

Featuring an offset design so the pegs are no wider than standard, Oggy offer two additional mounting positions with up to 35mm higher footrest location for much better ground clearance and increased lean angle. Easy to fit, these Oggy Rearset Brackets are supplied as a kit and do not require extra parts or a longer brake hose.

Oggy Billet Rearset Bracket Kits include:

- LH and RH machined billet brackets
- Longer SS shift rod
- Mounting hardware
- Brake switch mount
- Installation instructions.

## 6 Knobb Full Protection Kit in Action

## SR-i900A MOTORCYCLE ALARM WITH RFID AND TWO-WAY FM REPORTING

Motorcycle theft is a serious problem that needs a serious solution. Many modern motorcycles have immobilisers built into coded OEM ignition systems. The reality however is that stolen motorcycles are usually loaded into a vehicle and your immobiliser is next to useless. Two-way paging and sensor reporting is required so you can monitor your bike when you are not near it. Scorpio motorcycle alarms have all the features typical of alarms, however flashing lights and the 120dB siren will only stop the honest thieves. Scorpio security systems are designed to report the status of your motorbike to you in real time, inside or outside. This means you are paged immediately if any of the alarm sensors are triggered, Scorpio even advises the type of attack via the affected sensor. Once paged you will be able to take the appropriate action to protect your bike and yourself. Scorpio has a reputation for quality and innovation and has pioneered several technological advancements in motorcycle alarm security.

### SR-i900A information

SR-i900A is the next step in motorcycle security. Designed specifically for motorcycles it features two-way FM communication between the alarm module and LCD transceiver.

SR-i900A incorporates coded RF identification or 'RFID' between the transceiver and the alarm module for hands-free operation. This enables the system to automatically recognise the owner approaching the vehicle and overrides the security system automatically, effectively "standing down" the system when the ignition is switched on then when you turn the ignition off and leave the bike the system automatically re-activates. You won't even have to think about it and your transceiver won't even leave your pocket. Scorpio put minds at ease when a motorcycle is left alone. Signal range is subject to many variables including atmospheric RF saturation, power lines, topography and large structures. The miniature transceiver incorporates an interactive LCD that instantly confirms all commands and alarm triggers with easy to understand icons and text. The transceivers are rechargeable so no more mucking about with batteries!

The alarm module is easily mounted on most bikes and has been designed to take the punishment of motorcycle use. The alarm module motion sensing circuitry uses a digital accelerometer that detects both impact and changes of angles with very high sensitivity. The alarm module can be mounted in most motorcycles with ease and requires no adjustments or maintenance. It can detect interference with the bike's battery, has its own battery backup and a programmable 120dB multi-tone siren.

The SR-i900A includes an adjustable perimeter sensor that detects moving mass around the motorcycle and then warns people away with an audible chirp if they get too close to the bike, even before they start touching it!

To ensure durability, Scorpio alarms are manufactured to meet OEM specs and utilise waterproof connectors and a triple layer circuit board design that contains no mechanical or moving parts. A patented polyurethane encapsulating process ensures that the module is hermetically sealed and is guaranteed to withstand severe vibrations, extreme heat, and high water pressure. Scorpio's quality control standards even require a depth submersion test of three metres.

The system includes self diagnostics and utilises the finest components from brands such as Analog Devices, Intel, Texas Instruments and National Semiconductor, so you can rest assured that your alarm is a top quality product.

### Plug and Play harness:

While every Scorpio alarm includes a generic harness that only requires four connections, a range of optional factory harness connector kits are available to make for a really simple installation. These Plug and Play adaptors connect to the bike's factory wiring harness, using existing plugs in the OEM harness creating a simple non-destructive installation. See the bike models that harnesses are available for on the following pages.

### Remote ignition disable:

The RID-5 ignition disable/anti-hijack/immobiliser upgrade is also available for greater security. It allows you to remotely disable the ignition even if the keys are in the bike and the alarm is off. When the alarm is armed, the RID-5 acts as an engine immobiliser.

N.B. RID-5 is an optional extra and will require sound electromechanical knowledge to install correctly.

### Scorpio SR-i900A in brief:

- Super-compact main module measures 90 x 60 x 20mm,
- Dual axis accelerometer – detects impact and inclination,
- Backup battery built-in and voltage loss detection,
- Waterproof design meets OEM specifications,
- Three-stage perimeter motion sensor – detects movement around bike,
- Factory OEM wiring harness connector, plug-in looms available,
- Selectable audible/vibrating alerts on transceiver,
- Integrated 125dB programmable multi-tone siren,
- Violation display with time stamp,
- Ignition disable/anti-hijacking/immobiliser available as an optional extra.

## PRICES

**SR-i900A with RFID,  
Perimeter Sensor, Backup  
battery and 240v charger,  
\$499.00 RRP**

**RID-5 Remote ignition  
disable unit, \$49.00 RRP**

**Model specific Plug and Play  
wiring harness, \$39.00 RRP**

# CARGOL turn & go

BY GRYP

NAGESTI Patent

## THE LEADER IN EMERGENCY ACCESSORIES

Grypp is a world leader in motoring emergency accessories and a favourite with riders and drivers throughout Europe. You'll be happy to know that the Cargol Turn & Go puncture repair system has achieved German TÜV approval - the toughest automotive standards accreditation yet devised!

### Cargol Turn & Go tubeless puncture repair system

The Cargol Turn & Go emergency puncture repair system is the latest in emergency puncture repair. In fact, it's the fastest, cleanest, easiest and most effective system available. The Cargol Turn & Go system features a special toroidal plug that you can screw in by hand. The plastic that the screw is made from seals with the tyre rubber to form a resilient temporary repair that won't come out and is easily permanently repaired by a tyre specialist later.

### The four simple steps to your next puncture repair:

- 1.0 Remove the offending object from the tyre. Many of the Grypp Cargol kits come with needle nose pliers for this purpose.
- 2.0 Grab your Cargol and screw it into the puncture hole. That's right - no hole preparation required and you can screw it in by hand!
- 3.0 When the Cargol is fully seated, snap the head straight off the screw. The screw will finish close to the tyre surface. The puncture is now fixed.
- 4.0 Use the included gas cartridges and Schrader valve adaptor to inflate your tyre and away you go!

Cargol Turn & Go will mend most punctures (screws, nails etc) in tubeless tyres. It will not fix large slashes or punctured sidewalls.

There are a range of kit options to choose from. All of them are compact and easily stored on most bikes.

Special tools, skills, glue or muscle are NOT required... don't let a customer leave the shop without one!

**IMPORTANT NOTE: Roadside repairs to tubeless tyres should be inspected by a specialist as soon as practical.**

**New Grypp Kits now include extra C02 bottles and a neoprene pouch.**

Grypp Turn & Go plug emergency puncture repair kit # GK020

Grypp rope type emergency puncture repair kit # GK021

Grypp lge combo emergency puncture repair kit # GK022

Grypp smi combo emergency puncture repair kit # GK023

## TUBELESS PLUG KITS, TUBE PUNCTURE REPAIR KITS AND ACCESSORIES

### GK013 Combo Kit (left)

Includes Cargol and rope-type repair plugs, tools, CO2, pliers, knife, 90-degree valve adaptor and heavy duty storage pouch.

### GK001 Rope Kit (right)

Includes five rope plugs, pliers, CO2, knife, chalk, CO2 adaptor, heavy duty reaming and plug insertion tools.

### GK004 The "Original" (left)

Includes four Cargol Turn & Go plugs, CO2 and pliers, all in a handy bag for easy storage.

### GK005 Same as GK004 ... but

Includes softer "grey" Cargol plugs for repair of tubeless ATV tyres.

### GK003 Moto rope kit (right)

The same as GK001 but with smaller reaming and plug insertion tools for easier storage on motorcycles.

N.B. Rope plugs require use of tools to ream the puncture out to size to enable insertion of a rope plug using the special tools provided with the kit to repair punctures in tubeless tyres.

### GK011 Bicycle kit (left)

Includes 10 tube patches, multi-tool, CO2, glue, bicycle tyre lever/spanners, CO2 adaptor and storage pouch.

### GK006, 7 and 8 Top-up kits (right)

Top-up or mini kits include two Cargol plugs, CO2 and Valve adaptor. These kits do not include all required tools and should only be used by experienced riders who already have the appropriate tools.

### GK017 Tube Repair kit (left)

Includes various size tube patches, CO2, glue and CO2 adaptor.

### Valve & CO2 Adaptors (right)

Makes inflation of tyres with hard to reach Schrader valves a much easier proposition.

GV012: 90-degree Schrader valve extension.

GV001: Straight CO2 cartridge adaptor.

GV011: 90-degree CO2 cartridge adaptor.

GV021: 35-degree CO2 cartridge adaptor.

### Spare Parts

Part	Description
GB003	Pack of three CO2 cartridges
GB050	Bulk box of 50 CO2 cartridges
GM006	Pack of five rope type plugs
GC003	Pack of 3 Carol Turn&Go plugs

## **EJK Fuel controller for EFI-equipped motorcycles and other power sport vehicles**

The EJK is an aftermarket EFI control module manufactured by Dobeck Performance or DP as they're widely known. Dobeck Performance is a worldwide leader in research and development for EFI controllers to increase performance and drivability across a vast assortment of powersport vehicles.

DP's vision for the development of their technology leans towards simplicity and customization. DP engineer products as a tool kit for others to easily configure and adjust to achieve improved all-round performance without the need for special skills or expensive equipment.

Dobeck Performance products are designed and developed to provide an affordable solution to increasing the "fun factor" or ridability of your powersports vehicle. "Power and performance" describes not only the powersport industry, but the Dobeck mindset as well.

The real advantage of the EJK is that the control interface functions are broken down into "jet zones" (like a carburetor). It takes the knowledge and experience that many have with tuning carburetors and converts it to a fuel injection interface.

The EJK interface makes it easy to tune for different modifications. With patented technology, this box does not default computers or trip engine lights. The EJK uses load-based technology to monitor the demand on your motor and provide a fuel solution to reach optimum performance. The plug-n-play units connect directly in your factory wiring harness for easy installation.

### **KEY FEATURES AND BENEFITS OF DP ELECTRONIC JET KITS**

#### **No computer needed**

The EJK controller is one of the only controllers on the market which allows a large range of adjustability without the use of a computer. We like to use the term 'on-the-fly' tuning. You can literally ride the bike, make adjustments, and instantaneously feel the results. Obviously for safety purposes we recommend you pull over to the side of the road before making adjustments. Some aftermarket EFI controllers like to claim 'on-the-fly' tuning which to them means toggling between a couple of preset maps. The EJK controller actually has 11,390,625 available maps in the unit which are accessible without using a computer to reprogram the unit. There is a computer program called POWERLAB and EJK controllers can be reprogrammed via a computer, but most users do not require this ability. Why deal with the complexity? It's an Electronic Jet Kit to make fuel injection tuning easy, simple, and fast so you can enjoy more time riding.

#### **No dyno required**

You do not have to be a professional mechanic or tuner with access to a dynamometer in order to tune your vehicle with the EJK controller. Knowledge and good equipment obviously are a huge plus, but you can do just as good a job and sometimes better by tuning in real world riding situations. The EJK controller allows this by breaking down a drive cycle into very understandable zones to make adjustments. Most EJK controllers have the basic Idle/Cruise, Acceleration, and Full Throttle zones to adjust. Every rider can understand this terminology. The greatest advantage of tuning your vehicle yourself is your ride will have a custom setup specific to your riding style.

#### **Plug-N- Play Installation. Minutes to Install, Base Settings are Preset**

All of the offered EJK controllers are plug-n-play installations and can be done in a manner of minutes instead of hours. All you have to do is locate the OEM injector connections on your vehicle. Most of the time this will only require you to remove a few components to gain access to these injector connections. A number of new applications will also require you to find the O2 connections on your vehicle. Power for the unit is gained through the injector connections and a black ground wire just needs to be attached. After physically installing the EJK controller start the bike, perform the usual pre-ride checks and you are all set to go on a test ride. The unit comes pre-programmed to suit Stage One setups for each application. After your initial test ride you can then make fine tuning adjustments which may be required depending upon modifications made to your motorcycle.

## EJK Uses Unique Load Based Technology

The EJK controller uses Load Based Technology which sets it apart from most of the competition. Most EFI controllers use what is called 'Alpha-N' tuning technology. Alpha-N tuning is associated with just using Throttle Position (TPS) and RPM as the factors to make tuning adjustments. Load Based technology differs by using Rate, TPS and RPM as the key factors for adjustment. Load Based tuning allows a user to tune their vehicle for every gear and for all riding conditions. Load can easily be explained by stating that riding up a hill puts more "load" on the vehicle than driving on a flat road, but yet the same TPS and RPM can be achieved in both circumstances.

## Offers Full Range Tunability

EJK stands for Electronic Jet Kit. Like carburetor jet kits of the past, the EJK offers a range of adjustability to tune your vehicle. Instead of physical jets and needles the EJK has this adjustability built into the unit and can quickly be adjusted while riding the vehicle. With all EFI vehicles, software has replaced some of the hardware. The EJK controller can be installed and set to actually allow the user to still run a stock configuration, but allows the user to add or subtract fuel within easy to understand tuning zones.

## Does Not Interfere with Stock ECU Operation

This is a very common feature of all aftermarket EFI controllers, but needs to be stated to reassure all end-users. The EJK controller does not trip any engine codes or affect the ECU operation in any way.

## Simple Push Button Adjustment Interface

The EJK controller offers 'on-the-fly' adjustment using three push buttons on the label interface. The three buttons are labeled MODE, PLUS, and MINUS. With power supplied to the box by either starting the vehicle or just turning the key on, the adjustment modes are accessed by pressing the MODE button. Light setting changes are then made for each respective mode by pressing the PLUS and MINUS buttons. No extra tools are required to make tuning adjustments.

## Water-Resistant

The hardware components within an EJK controller are covered with a substance to make the controller water-resistant. The EJK controller is still an electrical device and without this coating would short-circuit when in contact with water based substances. The EJK controller is NOT 100% water proof, but will continue to function properly through rainstorms, snow or after washing your bike.

## Available for most Powersport vehicles

The EJK range covers Supersports, Cruisers, Touring, Naked, Muscle, Dual-Sport, Scooters, Motocross and Trail motorcycles. We also have controllers for Side-by-Side ATV's, Personal Watercraft and Jet Skis.

## PRICING

<b>Single-cylinder vehicles,</b>	<b>\$349.00 AU RRP</b>
<b>Multi-cylinder vehicles,</b>	<b>\$399.00 AU RRP</b>
<b>Some later Harley models,</b>	<b>\$419.00 AU RRP</b>

## EJK + DNA = Performance

Choose EJK and DNA for the easy and effective performance solution.

Gain 3hp on most 450 MX bikes with little cost or set up time.

Fit a DNA filter, plug in an EJK controller and go roost.

## NEWSFLASH!!!

New models are continuously being added to the EJK range. Check kenma website for updates.

## MOTOSPRINT WHEELS

These spoked wheels are available for the most popular MX and Enduro bikes produced in the last 10-15 years. Off-road tough, these affordable wheels are sold separately or as pairs in colour combo's and sizes. Suitable for MX, Enduro, Motard, Dirt Track, and some Mini Bikes

### Features:

- Billet 6061 hubs,
- Straight-pull heavy duty 6-gauge stainless steel spokes,
- Nickel plated brass nipples,
- Colour or plain silver,
- Spacers with retention shoulder supplied,
- Dual lip seals,
- Dual bearings on drive side rear,
- Spokes and parts available,
- 19 x 2.15" Dirt Track front wheels,
- Mini Wheels for Honda and KTM.
- 17" Wheel for Motard.

See fitment list for colours and sizes to suit your moto.

### MotoSprint Billet Throttle, \$69.00 RRP

These single cable side pull throttles are a 1/4 turn quick action on all but the largest of carburettors. Anodised billet alloy construction for toughness and light weight. Never bust throttle tube again. Available in Black, Red, Gold, Silver and Blue.

## FULL SIZE MX, ENDURO, MOTARD AND DIRT TRACK WHEELS

**21" x 1.60" Front Wheels** \$398.00 RRP.

**18" x 2.15 Rear Wheels** \$579.00 RRP.

**19" x 2.15 Rear Wheels** \$579.00 RRP.

**19" x 2.15 Dirt Track Front Wheels** \$439.00 RRP.

**17" x 3.50 Motard Front Wheels** \$489.00 RRP.

**17" x 4.25 Motard Rear Wheels** \$729.00 RRP.

**17" x 5.00 Motard Rear Wheels** \$729.00 RRP.

## MotoSprint Motard Kits

Turn almost any late-model Enduro or MX bike into a smoking motard racer the easy way with a Kenma Motard Build Kit.

Available to suit:

- Honda CRF: Red Hub & Black Rim
- Husaberg: Blue Hub & Black Rim
- Husky FC & FE: Blue Hub & Black Rim
- KTM SX-F & EXC: Orange Hub & Black Rim
- Kawasaki KXF: Titanium Hub & Black Rim
- Suzuki RMZ, DR: Gold Hub & Black Rim
- Yamaha YZ, YZ-F, WR-F: Blue Hub & Black Rim

Kenma Motard build kits are supplied with the following parts:

- MotoSprint 17" x 3.5" front and 17" x 4.25" or 5.00" wheels featuring billet hubs, stainless 6 gauge spokes, nickel plated brass nipples, dual bearings on the drive side of all rear wheels, double lip seals and spacers with retention lips so you won't lose them when the wheel is removed.
- NG Brake 320mm oversize front rotor and caliper adaptor bracket, and rear disc in round or wave pattern.
- SBS Racing compound front and rear brake pads.
- Brake rotor and rear sprocket bolts.

### MotoSprint Motard Kit, \$1799.00 RRP

NOTE: KTM and Kawasaki kits are supplied with NG Brake wave rotor.

NOTE: Round or wave rotor, as well as 5" rear rim options, available at no extra cost. Colour of caliper adaptor can vary.

**Cam Donald, IOM legend**

## OSRAM - High Performance Globes, work Lights

# OSRAM

### OSRAM HIGH PERFORMANCE HEADLIGHT GLOBES

OEM equipment on many European brands, the Osram High Performance Motorcycle globe range is now available in Australia. While still meeting OEM specs, all Osram High Performance globes guarantee greater visibility over standard globes.

#### NIGHT RACER

**A must for uncompromising riders who want only the best.**

- Up to 90% more light
- Up to 35m longer beam
- 10% whiter light
- ADR-compliant

#### X-RACER

**High contrast bluish light, very modern look.**

- Up to 4200k whiteness (4300 is legal limit)
- Up to 20% more light
- Up to 20m longer beam
- ADR-compliant

#### SILVERSTAR

**HS1 35W globes with more light than 60/55w.**

- Up to 20m longer beam
- Double service life of standard globe
- ADR-compliant

### Smart Jump Starters Pty Ltd

12V Smart Jump Start and USB Charge Units are manufactured by a company specialising in multi-function jump starters powered by Lithium Polymer batteries.

Australian-owned and operated, SJS has a long association with the automotive aftermarket industry. Along with our manufacturing partner, we have designed and developed our products to the highest quality standard with safety and ease of use our prime objectives.

#### SPECIFICATIONS

Power pack sizes:

SSC01, 135x 78 x 33mm;

SSC05, 165 x 79 x 40mm;

SSC06, 185 x 85 x 43mm.

Weights:

SSC01, 275g;

SSC05, 495g;

SSC06, 540g.

Jump start output:

SSC01, 400A peak, 200A starting;

SSC05, 500A peak, 300A starting;

SSC06 600A peak, 300A starting.

Jumper leads:

SSC01, 10AWG;

SSC05, 10AWG;

SSC06, 7AWG.

All with insulated full copper and metal clamps. Soldered and crimped with Mosfet.

Battery chargers: SAA Approved 240vAC/15vDC 1Amp wall charger.

12v/15vDC, 800mA car charger.

Charge cycles: 2,000

Operating temperature range: -20deg C to 60deg C

Self discharge: 10 to 15 % over 12 months from full charge.

Discharge rate: 12VDC appliance @ 7 amps draw = 20 minutes.

Device charging:

SSC01, two 5V DC 2.1A USB ports, with USB cable, and eight adaptors;

SSC05, 5V DC 2.1A USB ports with USB cable, and eight adaptors;

SSC06, 5V DC 2.1A USB ports with 4-in-1 USB cable, IS8-compliant multi-voltage port — 12v, 16v and 19v DC, and eight adaptors;

LED flashlight: Three mode, full, SOS, and emergency flash

#### PRICES

**SSC01 Smart Start Charger 400A \$109.00 RRP**

Suits vehicles with up to 4.0 litre petrol engine, and V-Twin motorcycles under 1000cc

**SSC05 Smart Start Charger 500A \$149.00 RRP**

Suits vehicles with up to 3.0 litre diesel, or 6.0 litre petrol, and V-Twin motorcycles over 1000cc

**SSC06 Smart Start Charger 600A \$219.00 RRP**

Suits vehicles with up to 4.5 litre diesel, or 7.0 litre petrol, and all motorcycles

#### SSC56 PERSONAL CHARGER

5600mAh Suits iPhone, iPad, Samsung, Nokia, LG, Go Pro and many others.

Lithium-Ion battery technology.

Charge most phones up two times.

NOTE: charge rates vary depending on phone make and model.

**SSC56 \$39.95 RRP**

#### SSCTP001 Tyre Pump

For use with SSC01, SSC05, SSC06 Smart Start Chargers

**SSCTP001 \$39.95 RRP**

**SSC01 Smart Start Charger.**

**SSC05 Smart Start Charger.**

**SSC06 Smart Start Charger.**
