

SENA

Motorcycle Bluetooth® Communication Systems

SENA

Hear what you have been
missing at Sena.com

Designed for freedom. Built by riders.

Moving from Bluetooth 3.0 to Bluetooth 4.1 is like trading in your unicycle for a 1000cc bike. Hang on you're in for a ride. But performance potential means nothing without a skilled rider to bring it out of the machine. The same goes for Sena Bluetooth Communication systems vs. the competition. Lots of other brands tout Bluetooth 4.1, but without Sena's unrivaled commitment to getting the most out of the technology by combining the highest quality components with an unparalleled rider-driven design sensibility, you can never duplicate the genuine experience of Sena Bluetooth® Communication systems.

205
