ABOUT THE COMPANY

Moto National Accessories is a 100% Australian owned company and a national motorcycle accessories distributor. With its head office and main warehouse in Brisbane and further distribution warehouses in Melbourne and Perth, we have a very strong team of sales representatives personally covering all Australian states, and all with the same drive and focus:

> *" To deliver the highest level of customer service. "*

Our directors and experienced sales team are all long serving motorcycle industry people, with backgrounds from sales and distribution (both retail and wholesale), to wholesale accessories distributing. Our two managing directors have a combined 65+ years motorcycle industry experience, and our sales team have a combined 195+ years industry experience and respected professional reputation which strengthens our rapport with our 1500+ strong dealer network.

67 WORLD TITLES IN 19 YEARS

MADE IN ITALY

The Locatelli S.p.A. was founded in 1986 in the lively heart of Bergamo's Valleys. 1997 marked a major turning point for the company thanks to an impressive level of expertise, which included superior technical skills, a know-how that was second to none and the experience brought by years of hard, passionate work. Antonio Locatelli, the founder of the company was able to launch into the global market with a range of products. From that moment on, the company has signed its own collections with the Airoh trademark, a brand that in just a few years has grown to be one of the leading names in its market place with 67 world titles and counting.

GP500

GP 500 is a racing 100% Carbon Kevlar helmet, designed and conceived for the champions of speed. Thanks to the use of fine materials and a concentration of technology, the GP 500 is ready to make its mark.

Every detail has been developed thanks to the collaboration between racers and technicians, thus obtaining a high-performing helmet in all of its features: three different shell sizes, a certified face visor that is 50% tinted, predisposition for installation of the tear off, face visor locking system, the visor's antifog position and the emergency system for the release of cheek pads.

Its prerogatives are safety, maximum performance and enviable comfort.

GP500 REGULAR RED GLOSS

SIZE: S-XL

GP500 MATT BLACK

SIZE: S-XL

- Entirely 'Made in Italy'
- 100% 'Carbon Kevlar' shell construction / 3 shell sizes
- Ultra Light weight – from 1200g
- 'Max Vision', Self Adjusting Quick Release Visor - with 50% Tinting (Homologated)
- Equipped with Pinlock, Tearoff posts, & Visor Locking System
- Wind Tunnel Tested for Optimized Aerodynamics & Hi Flow Ventilation System
- AEFR – 'AIROH Emergency Fast Remove' Cheek Pads
- Removable Washable / Sanitized Transpiring Liner
- Spoilers front & rear for stability
- Nose Deflector, & 'wind stop' chin curtain
- ECE Approved

ST701

ST701 is the new full-face helmet designed in two different shell sizes and dedicated for touring and sport use at the same time.

The outer shell, which is realised with the use of carbon fiber, enabling a limited weight, places the ST701 as one of the lightest helmets of its category. Also, the EPS inner shell has been subjected to intense studies with the use of 4 different densities that therefore guarantee the highest safety standards.

The aerodynamics evolved, a powerful internal ventilation system, the extra wide visor with wide field of vision, the visor's antifog position that prevents internal fogging, the retractable sun visor and the Pinlock® Original lens included, are just some technical specifications that make this new product complete in its contents as well as having a strong character.

- Equipped with Pinlock
- Internal 'Sun Screen Visor' Tinted
- Bluetooth Coms port Ready
- Easy Fit Glasses Slot
- Wind Tunnel Tested for Optimized Aerodynamics & Hi Flow Ventilation System
- Removable Washable / Sanitized Transpiring Liner
- ECE Approved

ST701 SLASH YELLOW/MATT

SIZE: S-XL

MOVEMENT

Movement has won the recognition of "Kauftipp" in the prestigious German magazine Motorrad in the competition dedicated to helmets with sun visor.

Movement is a full-face HRT (High Resistant thermoplastic) helmet, made using materials of the latest generation. Its strengths are the extra wide field of vision, the visor's antifog position that prevents internal fogging and the retractable sun visor. The top vents and those on the chin guard provide an excellent internal climate in all situations.

The stop wind and the Pinlock® Original lens included, adapt to any adverse weather conditions guaranteeing a safe and precise driving experience.

AVIATOR 2.2

Aviator 2.2 represents the evolution of the Aviator 2.1, the champion helmet with which Airoh® has soared to the top spot of the podium in off-road disciplines, reaching the sports headlines. The helmet is available in three different shell sizes and is made with quality materials, 100% Carbon Kevlar, making it one of the lightest and best performing helmets of its class.

The strengths in this new version are the lightness, which is implemented further, the expanded field of vision, the new vent chin guard, the new rear spoiler and the new peak that provide maximum protection.

Great care has been taken for the interior that has been manufactured and designed with the latest materials ensuring optimal ventilation and breathability for those who practice sport at the highest competitive levels. Aviator 2.2 is equipped with a dust filter, which will prove a good ally during your days off-road and the emergency system for the release of cheek pads (AEFR).

Also rich endowment of accessories that provide the Kit Go-Pro®, covers for the vents used in the event of rain or mud, the extended peak, the kit screws and the tool kit that allows you to play in total autonomy all these adjustments. Airoh® is also proud to offer a product to the public that is completely identical to that used by our champions.

URBAN JET

RIOT

Riot is the proposal dedicated to the vintage style and cafè racer. The shell, made with the new PRE-PREG fibre technology, enables the limiting of weight, ensuring the rider a safe and light ride and reducing fatigue and stress on the neck and shoulders.

Riot is also equipped with an approved retractable sun visor, 50% tinted, offering maximum protection from the sun and some accessories can sold separately, such as the long face shield, which covers the face up to the chin, and the peak, applicable thanks to the three buttons on the front part of the shell.

Utmost care has been taken within the inner lining, removable and washable, made from fabrics of the latest generation, highly breathable and antibacterial. Completing it all is the practical and manageable micrometric retention system.

GARAGE

Garage is the new ultra-compact Jet helmet. Designed with a smart and stylish vintage look, it is available in full Carbon as well as in HPC (High Performance Composite) fibre technology.

Garage is available in three different shells that improve the user's comfort. The size of the shell make Garage one of the smaller and lighter Urban Jet on the market. The inner lining is a perfect fusion of cutting-edge functionality and breathability combined with a vintage leather effect, all the while being 100% removable and washable.

Vintage style Goggles are also provided with the helmet. Available, as accessories, bubble, long peak and peak "retro" visors.

This jet also poses particular attention to the safety, thanks to a highly functional micrometric retention system, as well as to a totally reflective edge that ensures visibility even at night.

VIDEO

HD VIDEO

Contour is about video first and foremost. Our engineers spend countless hours making sure our cameras pick up the small but important details, transition well in varying light conditions, and showcase beautiful colour. Shooting in four HD modes (1080p, 960p tall, 720p at 30 and 60fps) provides the best resolution for your chosen perspective.

CUSTOMIZED VIDEO

Contour takes video customising to a whole new level. With adjustable white balance, exposure, metering, and mic gain you can be sure your audio and video are perfect for your shooting conditions. Four HD modes and ultra slow motion at 120 fps add even more shooting flexibility.

EASE OF USE

SIMPLICITY

Contour's locking Instant On-Record switch makes shooting video easier than ever before. No power button, no problem. Our award-winning, low-profile design makes it so the camera practically disappears wherever mounted.

PERFORMANCE

DURABLE

Mud. Dirt. Snow. Rain. The places you travel can be some of the roughest locations on earth. Contour cameras are made to withstand encounters with everything from mud puddles, to monster barrels at Teahupoo, to drops down the Khumbu Icefall. The rugged aluminum body withstands serious abuse, while the water-resistant design stands up to moisture.

LIGHTWEIGHT

Contour cameras are extremely light-weight. At 5.1oz (ContourROAM3), and 5.5oz (Contour+2), they're featherweight and barely noticeable. Once you mount one on, you can forget it's even there.

AUDIO

Video is only one part of the story. Contour cameras are built with omni-directional microphones, and the Contour+2 comes with an external 2.5mm microphone jack. The external jack expands your recording options for interviews or challenging production situations.

LASER ALIGNMENT

Lasers on the ContourROAM3 and Contour+2 enable you to easily align your shot. Point it at the angle you're shooting to frame the action and you'll never shoot the sky or your feet again.

SHARE

OUR CAMERAS ARE KNOWN FOR RAISING THE BAR IN BUILT§IN TECHNOLOGY. OUR NUMBER ONE PRIORITY IS TO MAKE THE BEST PRODUCT ON THE MARKET. THESE ARE THE FEATURES THAT MAKE CONTOUR CAMERAS THE BEST IN THE BUSINESS.

YOUR DATA - EVERYWHERE

Video is exciting on its own. Adding in GPS brings the experience to a whole new level. With a built-in GPS receiver, the Contour+2 tracks your speed, elevation, and location while you're shooting. Video overlays showcase your data while you watch your footage, bringing your video to life like never before. Easily share your video + data with your favourite social networks.

YOUR DATA, EVERYWHERE

The Contour+2 provides beautiful HD video with GPS overlays for speed, elevation, and distance. Share this new layer of information to Facebook, YouTube and Vimeo.

120FPS

In addition to shooting in four different HD modes, including 1080p, the Contour+2 also shoots 120 frames per second in 480p.

LIVE STREAMING

Bring events to life like never before via Contour+2's HDMI out port. Live stream events, meetings, and more.

LOCKING INSTANT ON-RECORD SWITCH

Simply slide the Instant On-Record switch forward and never have a doubt if you're recording.

EXTERNAL MICROPHONE JACK

Achieve clear, crisp audio easily with Contour+2's external microphone jack.

MOBILE CONNECTIVITY

Use your mobile device to preview your shot before and while you're recording, as a remote control to start/stop your camera, or to tweak your camera settings in the field.

VENTED HELMET MOUNT

The Vented Helmet Mount gives your helmet the adjustability to place your Contour in multiple positions on your helmet, giving you another unique angle to record your activity. Simply slide the straps through your vents, and then cinch them down. Place the camera on the mount, and use the built-in adjustable tilt to fine-tune the angle.

+ Fits most vented helmets
+ Built-in adjustable tilt allows for fine tuning your angle
+ TRail™ system allows easy on and off

Product: Vented Helmet Mount
Part Number: VHR2550

GOGGLE STRAP MOUNT

The Goggle Strap Mount is perfect for your snow or dirt adventure where goggles are a must. Simply slide the mount base on your goggle strap, and then click the camera attachment into the base. Align the camera to your desired angle, and you're good to go.

+ Easily adjustable for that perfect angle
+ Great for days when no helmet is needed

Product: Goggle Strap Mount
Part Number: VHR2650

FLEX STRAP MOUNT

The Flex Strap Mount is a versatile mount that is designed for use across a multitude of sports and with diverse bar shapes. Strap it to the downtube of your bicycle or to the roll cage in your car. The soft flexible straps hold steady and dampen vibration to assure you get clear, crisp HD video. It comes with two strap sizes and utilizes the popular rotating mount so that you can get any angle that you need.

+ Fits bars 20mm to 70mm
+ Comes with two strap sizes - 9" long and a 5.25" short strap for smaller diameters

Product: Flex Strap Mount
Part Number: VHR2755

BAR MOUNT

The Bar Mount affixes to a variety of handlebar sizes by two Allen head bolts so it's easily adjustable with your standard bike tools. The twist lock adjustment helps you achieve the perfect angle and the TRail™ system helps you mount and remove your camera quickly.

+ Large diameter enclosure allows for use on bars from 15mm to 33mm
+ Twist lock angle adjustment system lets you set that perfect angle
+ TRail™ system allows easy on and off

Product: Bar Mount
Part Number: VHR2780

PROFILE MOUNT

The Profile Mount is our simplest and most popular mount. Its small footprint and simple design make it practically disappear on your helmet. Designed for one-angle shots, you'll barely notice the mount once it's affixed.

+ Slim build conforms to your helmet
+ Sturdy 3M adhesive backing

Product: Left & Right Profile Mount
Part Number: VHR4165 (2PK)

SUCTION CUP MOUNT

This powerful Suction Cup Mount from our friends at Panavise attaches your Contour camera to any windshield or car body. This meticulously designed mount makes it simple to turn, tilt, and rotate your camera 360 degrees. Suction pad advised for windshields and flat (non-porous) surfaces.

+ Simple suction cup design makes it easy to get a strong hold
+ Won't scratch or leave any marks
+ Adjustable body makes it easy to get any angle

Product: Suction Cup Mount
Part Number: VHR2810

SURFBOARD MOUNT

The Surfboard Mount is perfect for your surfboard, wakeboard, jet ski, or other water based sports. Built from the ground up to take the abuse that the wind and waves can dish out and still highly flexible so that it can adjust to a variety of board shapes.

+ 360º rotation and 180º tilt
+ Single lever operation for wet or cold hands
+ Works with all Contour Waterproof Cases

Product: Surfboard Mount
Part Number: VHR3555
Product: Surfboard Mount Base
Part Number: VHR3562

360º HELMET MOUNT

The 360°Helmet Mount is a versatile mount made for a variety of activities. The combination of infinite adjustment and the small footprint of the base make it perfect for mounting onto a variety of helmets. Works great on a kayak, a snowmobile, or just about anywhere you need to get that creative angle.

+ 360º rotation and 180º tilt
+ Glove-friendly, single lever operation
+ Works with all Contour cameras and Waterproof Cases

Product: 360º Helmet Mount
Part Number: VHR3570
Product: 360º Helmet Mount Base
Part Number: VHR3561

POLE MOUNT

Whether you're waist deep in powder, taking hot laps in the park, or fishing for your dinner, the Pole Mount will bring new and unique perspectives to your video. Attach your Contour to a hiking pole, ski pole, or any pole that is 11 to 18 millimeters. Secure it via two Phillips head screws and then use the multi angle head to get any angle you need.
+ Secures easily via two Phillips head screws
+ 360° rotation and 180° tilt
+ TRail™ Mount system allows easy on and off

Pole Mount Part Number: VHR3575
Pole Mount Base Part Number: VHR3576

HEADBAND MOUNT

The Headband Mount is great for easy mounting when hiking, fishing, or if you just want to capture your point of view. The elastic headband is easy to adjust via sliding buckle, and the TRail™ system allows you to quickly attach your Contour camera. The mount is firm, and
provides jiggle-free recording for all of your helmetless activities.
+ Elastic headband fits all head sizes and works over hats and beanies
+ Easy on and off with the TRail™ system
Part Number: VHR3610

HAT MOUNT

The mount that every sportsman needs, the Hat Mount attaches to any soft or flexible fabric hat and securely holds your Contour camera. Based on a simple press fit, manual angle adjustment allows you to capture that first fish of the day or every moment of your hunting trip. + Fits most flexible fabric hats

+ Patented TRail™ allows for easy on and off
+ Get the perfect angle locked in place with full 360° rotation

Part Number: VHR3750

ROLL BAR MOUNT

Co-developed by Contour and RAM, the Roll Bar Mount was built specifically to attach your Contour to a multitude of round diameters. Using a double socket arm and ball design, it adjusts easily and simply by turning a central wing nut. It gives you almost infinite adjustment to achieve perfect shooting angles. The marine grade aluminium mount attaches via a bonanza strap to round bars from 2" to 3" in diameter. The patented design also dampens shock and vibration to help you create smooth video.
+ Securely mounts your Contour to round surfaces from 2"-3" in diameter
+ Marine grade aluminium that is strong and lightweight
+ Easy on and off via the Universal Mount or the built in quarter twenty tripod mount that is compatible with Contour cameras.
Part Number: VHR3800

PICATINNY MOUNT

The Picatinny Mount was developed specifically to mount your Contour Camera on tactical weapon platforms, or other devices that use a standard MIL-STD-1913 Picatinny/weaver rail.
This mount is built tough with reinforced polymer that resists vibration, recoil forces, and heat, but is also lightweight and easy to use. It mounts securely and easily to the rail via a thumbscrew.
+ Securely mounts your Contour to standard MIL-STD-1913 rail systems
+ Lightweight and strong construction
+ Easy on and off with the TRail™ system
Part Number: VHR3900

ROTATING FLAT MOUNT

The Rotating Flat Surface Mount is the ultimate in smart design and simplicity. This useful multi-purpose surface mount was developed to be easy to use, and gives you the confidence that once locked, it will stay in place. Simply slip the camera onto the TRail™s, rotate the camera into position, push on the lock button, and you are good to go.
+ Easy on with the TRail™ system
+ Solid ratchet type rotation lets you set that perfect angle
+ Easy to push rotating button confidently holds your camera
Rotating Flat Surface Mount
Part Number: VHR3720
Rotating Flat Surface Mount Adhesive
Part Number: VHR3721

SURF WAKE MOUNT

The Surf-Wake Mount was designed to be one of the most adjustable mounts that we offer, built to withstand any weather and waves that you put it through. The adhesive pad securely adheres the mount to your board, and the 360° rotating base and rubber ball joint lets you capture any angle on the water or at the beach.
Part Number: VHR3500

3.1 EYEWEAR

SOL 1 CBSG017

BLACK FRAME, POLARIZED SMOKED LENS

The Sol I is a stylish sunglass with wrap around frames and polarized lenses. The smoked, polarized lenses have an 8 base wrap and are decentered, ensuring visual clarity. The injected polycarbonate lenses provide high impact resistance and have a hard coating on the surface of the lenses making them scratch resistant. The frame is made of Grilamid TR90, which is a high quality nylon material that provides comfort and durability. Microfiber pouch included for easy transport.

RAPTOR II CBSG003

Get wrapped up in these classic pieces of eyewear with an aggressively sculpted frames made of Grilamid TR90 in a black matte finish. Three sets of shatter resistant polycarbonate interchangeable lenses include anti-fog smoked, amber and clear lenses. Two sets of removable foam aid in the reduction of wind blasts and prevention of fogging. Finally, the detachable, adjustable strap gives the maximum amount of options for the multiple functions of this pair of eyewear.

ROADMASTER CBSG009

Dominate the road with this convertible photochromic eyewear. The adjustable strap allows easy conversion from sunglass to goggle, while the photochromic polycarbonate lenses lighten when indoors and darken when exposed to sunlight. Removable closed cell foam padding adds comfort for extended periods of wear while protecting the eyes from dust and debris.

CHARGER CBSG013

The Charger features ANSI 787 certified, anti fog, polycarbonate lenses and clean wrap around line; it's an excellent choice for safety AND style. The durable, highgloss,black nylon frame fits securely and comfortably, even on smaller faces. The Charger is also available with clear lenses.

SMOKE LENS
CBSG005

CRUISER GOGGLES

The Cruiser goggle is stylish and ideal for riding, sky-diving and any other activities requiring eye protection. Open cell foam adds comfort and creates a sealed fit in order to keep out wind. Ventilation slits on each side of the frame and an anti-fog coating prevent the lenses from fogging to ensure visual clarity. Prescription ready motorcycle goggles!

CLEAR LENS
CBSG008

AMBER LENS
CBSG007

VIXEN HIGHWAY HONEY®

Ladies

The Highway Honey™ sunglasses have been created by female industry professionals specifically for women who ride & want upscale accessories to match their lifestyles. The frames are made of flexible Grilamid TR90 making them extremely lightweight and flexible. Each frame is hand polished in a multi-step process ensuring the highest quality design and assembly. The lenses are smoked polycarbonate making them shatter resistant while providing 100% UV protection. Each frame is accompanied with a carry case.

VIXEN PAISLEY CBSG016

BLK FRAME, PAISLEY

VIXEN HIGHWAY HONEY CBSG014

TORTOISE FRAME, LASER PAISLEY

VIXEN SPIDERWEB CBSG015

SPIDERWEB W/ RHINESTONE

XRH CONVERTIBLE CBSG001

Go extreme with this ANSI Z87+ approved ultimate convertible sunglass. A second frame front with clear lenses, removable foam and detachable strap provides 8 different combinations for the price of one. Removable closed cell memory foam maintains visual clarity and comfort by blocking wind and dust. While the adjustable strap enables quick conversion from sunglass to goggle. This eyewear includes a carrying case and microfiber cleaning cloth for maximum care and convenience.

DEFENDER CBSG018

BLACK FRAME, POLARIZED SMOKED LENS

The Defender has great wrap styling and is extremely comfortable and light weight. The frame is made of TR90 Grilamid which is a nylon material, making the Defender frames extremely flexible and durable. The lenses are shatter resistant polycarbonate and polarized to block glare from the surrounding environment, whether it be on land or water. The Defender includes a microfiber pouch and are the perfect Polarized motorcycle glasses.

GUNNER CONVERTIBLE CBSG019

BLACK FRAME, PHOTOCHROMIC & CLEAR LENSES

The Gunner merges fashion with functionality by combining the most desired aspects and features of any eyewear available. The wraparound Grilamid TR90 frame can be worn either with smooth temples as a sunglass or with a detachable, adjustable strap as a goggle. Vented removable closed cell foam prevents lens fogging and keeps wind and debris from distorting vision. Photochromic lenses that change with altering light allow for greater clarity and for night the Gunner also comes with a clear set of lenses.

BLACKJACK CONVERTIBLE CBSG011

BLACK FRAME, 3 LENSES

Improve your odds with this eyewear that is both convertible and interchangeable, making it ideal for use on and off the road. Two sets of removable foam are included for extra protection and comfort. In addition, an adjustable strap converts from sunglass to goggle, while three sets of polycarbonate lenses create smooth transitions for clarity from sunrise to sunset. Perfect motocycle riding glasses!

INVADER CBSG020

BLACK FRAME, PHOTOCHROMIC LENS

Ignite sparks with these glasses that are ideal for the practical, yet style conscience person. The wrap around frame is made of flexible, durable Grilamid TR90 and the open cell foam keeps wind and debris out of your eyes. Continue wearing this piece of eyewear from day into evening due to the photochromic lenses, which adjusts to UV light. The Invader photochromic lenses have a transmission rate of 47% while in low light conditions to 15% while in the sun.

AMBUSH CONVERTIBLE CBSG021

BLK FRAME, ANTI-FOG SMOKED LENS

Ignite sparks with these glasses that are ideal for the practical, yet style conscience person. The wrap around frame is made of flexible, durable Grilamid TR90 and the open cell foam keeps wind and debris out of your eyes. Continue wearing this piece of eyewear from day into evening due to the photochromic lenses, which adjusts to UV light. The Invader photochromic lenses have a transmission rate of 47% while in low light conditions to 15% while in the sun.

FABIO QUARTARARO

MOTO3 WORLD CHAMPIONSHIP
MULTIxPOLE POSITION & PODIUM

ABSOLUT CONTROL

RFX RACE
White / Red

White / Red | Black / White | Black / Red

Fabio Quartararo may be only 16, but this hasn't stopped him achieving poles and podium placings in Moto3, nor from taking advantage of all the benefits offered by FIVE gloves. He's achieved his rapid racing progress wearing them ever since he was 8. He's also made a huge contribution to the development of the RFX Race glove, the first one to offer higher protection with the use of thermoset carbon composite, an ultra-light, ultra-resistant material forged in an autoclave and thus far used only in the aviation industry and Formula 1. Fabio holds the world in the palm of his hands, gloved, since the age of 8, by FIVE.

Five ADVANCED GLOVES

Moto National Accessories | Toll Free 1300 885 355 | www.motonational.com.au

RFX RACE

With the RFX Race™, FIVE is raising standards by introducing Thermoset Carbon Composite back-of-hand protection – a first for a production glove. Hitherto used in aeronautics and on the highest-level competition vehicles (Formula 1, MotoGP, etc.), Thermoset Carbon Composite is obtained by fusing carbon fibres with epoxy resin in a high-pressure oven, making this ultra-light material almost indestructible by abrasion. By incorporating this technology and innovative materials, developed with the FIVE official riders in MotoGP, Superbike and Endurance World Championships, the RFX Race™ is the most effective protection currently available... and is without doubt the most advanced of all the FIVE Advanced Gloves products.

RFX RACE FLURO

Designed for high performance, the RFX Race offers the highest level of safety currently available, thanks to its triple protective shell made of Thermoset Carbon Composite. This material, generally found in aerospace or Formula 1, provides exceptional abrasion resistance. Protection is maximized by the use of full grain leather, multiple reinforcements with traditional carbon and a Kevlar® lining. Steering precision and comfort have been our top priority. This is the glove designed and used by official FIVE riders in MotoGP, SBK and Endurance World Championships.

One-piece knuckle shell with leather upper. Velcro closure. Metal FIVE logo. Leather with embossed stripes. High-strength synthetic leather palm. Palm slider.

DAKOTA

City glove with triple stitching on the topside reminiscent of the driving gloves worn by gentlemen. Features quilted leather in the sensitive areas – wrist, outside of palm. Tab and press-stud closure. Pull-tab for easy-on/off. Ultimate refinement: a number of perforations on the fingers allow a discreet but very effective glimpse of the red lining. V-FIVE Signature.

BREATHABLE - WATERPROOF

To head into the winter season knowing you've got it covered. Hipora® breathable-waterproof membrane. 200g Thinsulate™ lining. Thermal insulating gusset to keep warmth inside the glove. Single control button for 3 heating levels. Zipper for easy-on/off. Knuckle shells and palm sliders. Leather palm. Digital Pittard™ palm, index and middle finger reinforcement for a better grip of steering controls in wet weather. Reflective logo and strip for night visibility and added safety. Designed for long-distance rides in winter conditions.

WFX1

High performance technical winter glove. Leather structure. High level of protection. Carbon shells on knuckles, fingers and palm. Hipora® breathable-waterproof membrane. 200g Thinsulate™ lining plus aluminium lining for maximum insulation. Kevlar® seams throughout the palm combined with a foam "shock absorbing" pad. Pittard Digital™ grip reinforcement patches on steering control contact surfaces for maximized grip in wet weather. Double closure system. Protective flap over adjustment strap (prevents the strap from breaking or releasing in a fall) based on Racing gloves. Heat insulating collar gusset to keep warmth inside the glove. Cordura™ Stretch gusset on upper part for optimized comfort and fit. Reflective strips on index and middle finger. Padded leather and foam "shock absorbing" reinforcements on sides of forearms. Designed for long-distance rides. The WFX1 WP sets itself apart with an impressive fit for a winter glove. The ideal combination of protection, comfort and precise steering control.

ADVANCED GLOVES

MXF PRORIDER S WHITE

This is the latest generation of motocross gloves built based on the experience of MX Grand Prix FIVE riders Valentin GUILLOD and Dylan FERRANDIS. Even more lightweight, thin, elastic, and breathable in their "S" version than the MXF PRO RIDER. The topside is made from a single piece of YP Mesh. Finger contours are in small Airmesh™. Everything is done to create unparalleled fit. Finger protection and Sonic™ FIVE logo. The thumbs feature comfort gel at grip contact points in order to reduce the risk of blisters. Palms have protective gel to absorb shock in the event of a fall. The palm area is made from Nanofront™, which ensures control and grip that are unequaled to this day. A Lycra® comfort gusset is placed underneath the TPR and Velcro adjustment tab, which stops dirt from getting into the glove. The ultimate in MX gloves.

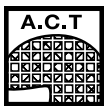
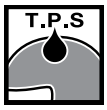
HELMET FEATURES ICONS



A.C.T. (Advanced Composite Technology)
Combination of hyper glass fibre and high-strength organic fibre succeeded light weight and increased strength. It is an advanced high-spec shell.

M.C.T. (Multi Composite Technology)
Hyper glass fibre shell with strong glass fibre layers.



T.P.S. (Thermo Plastic Shell)
Thermo plastic shell with high impact resistance.

XS (Extra Small)
Head size: 54-55cm is available.

XL (Extra Large)
Head size: 60-61cm is available.

XXL (Double Extra Large)
Head size: 60-61cm is available.

3-Shell
3-shell-sizes achieve the fine fitting.

Pinlock® Original Insert Lens Included
Pinlock® Original Insert Lens is packaged in with the helmet. Effective in winter, raining and so on.
Balance the temperature of the inside and the outside.

Top Aero Ventilation System
Kabuto's technology: Takes in the frontal air forcibly and emits hot inner air to the outside.

Wake Stabilizer (PAT.)
Kabuto's technology: Controls the air around the helmet and decreases the pressure to the rider.
(PAT.No.4311691)

Chin Open System
Flip-up style, great for urban riding.

Head Ventilation
Ventilation with shutter function to take the outer air in.

Chin Ventilation
Ventilation with shutter function to take the outer air in.

Rear Ventilation
Ventilation with shutter function to push the inner air out.

2-Shell
2-shell-sizes achieve the fine fitting.

Pinlock® Original Insert Lens Prepared
The pins for Pinlock® Original Insert Lens are attached on the shield so Pinlock® Original Insert Lens is attachable. Pinlock® Original Insert Lens; Effective anti-fog sheet in winter, raining and so on by balancing the temperature of the inside and the outside.

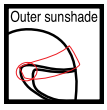
Single Action Shield System (PAT.)
Quick detach by pushing the release button and pulling out the shield.
(PAT. No.4839373)

CF-1 Quick Change Shield System
Detach shield just by pulling the lever on the shield ratchet. Easy to exchange and to maintain.

C-1K Quick Change Shield System
Detach shield just by pulling the lever on the shield ratchet. Easy to exchange and to maintain.

H-3 Quick Change Shield System
Detach shield just by pulling the lever on the shield ratchet. Easy to exchange and to maintain.

UV Protection Shield
Protects eyes and skin from UV rays.



Outer Sunshade
Open/close sunshade outside the helmet.

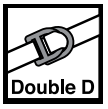
Inner Sunshade
Open/close sunshade inside the helmet.

Wind Shutter
Reduce air blowing in from chin area. Detachable/ Attachable, depending on a season and purpose.

Full Washable Inner Lining
All of the interiors are detachable and washable by hands or with washing machine.
(Please use the washing net when using the washing machine.)

Washable Inner Lining
Some of the interiors are detachable and washable by hands or with washing machine.
(Please use the washing net when using the washing machine.)

G-slit
Easy to wear glasses by special cheek pads.



Double D Ring
D shaped steel rings for chinstraps, adapting for racing models.

Buckle
Easy to fasten / unfasten the buckle just by pressing the release button. Great for touring and city riding.

Micro Ratchet Buckle
Easy to fasten / unfasten the buckle just by pulling the string.

Custom Fitting Kit
Size adjusting sponges are packaged in for better fitting.

MOFF (3-year-deodorization)
"MOFF" is developed with a new odour elimination nanotechnology never done before. Instant deodorization with an environment-friendly nature as well as safety characteristics.

COOLMAX®
COOLMAX® designed to move moisture away from the body and enhance fabric drying characteristics keeps you feel cool and dry.
*COOLMAX® is a trademark of INVISTA.

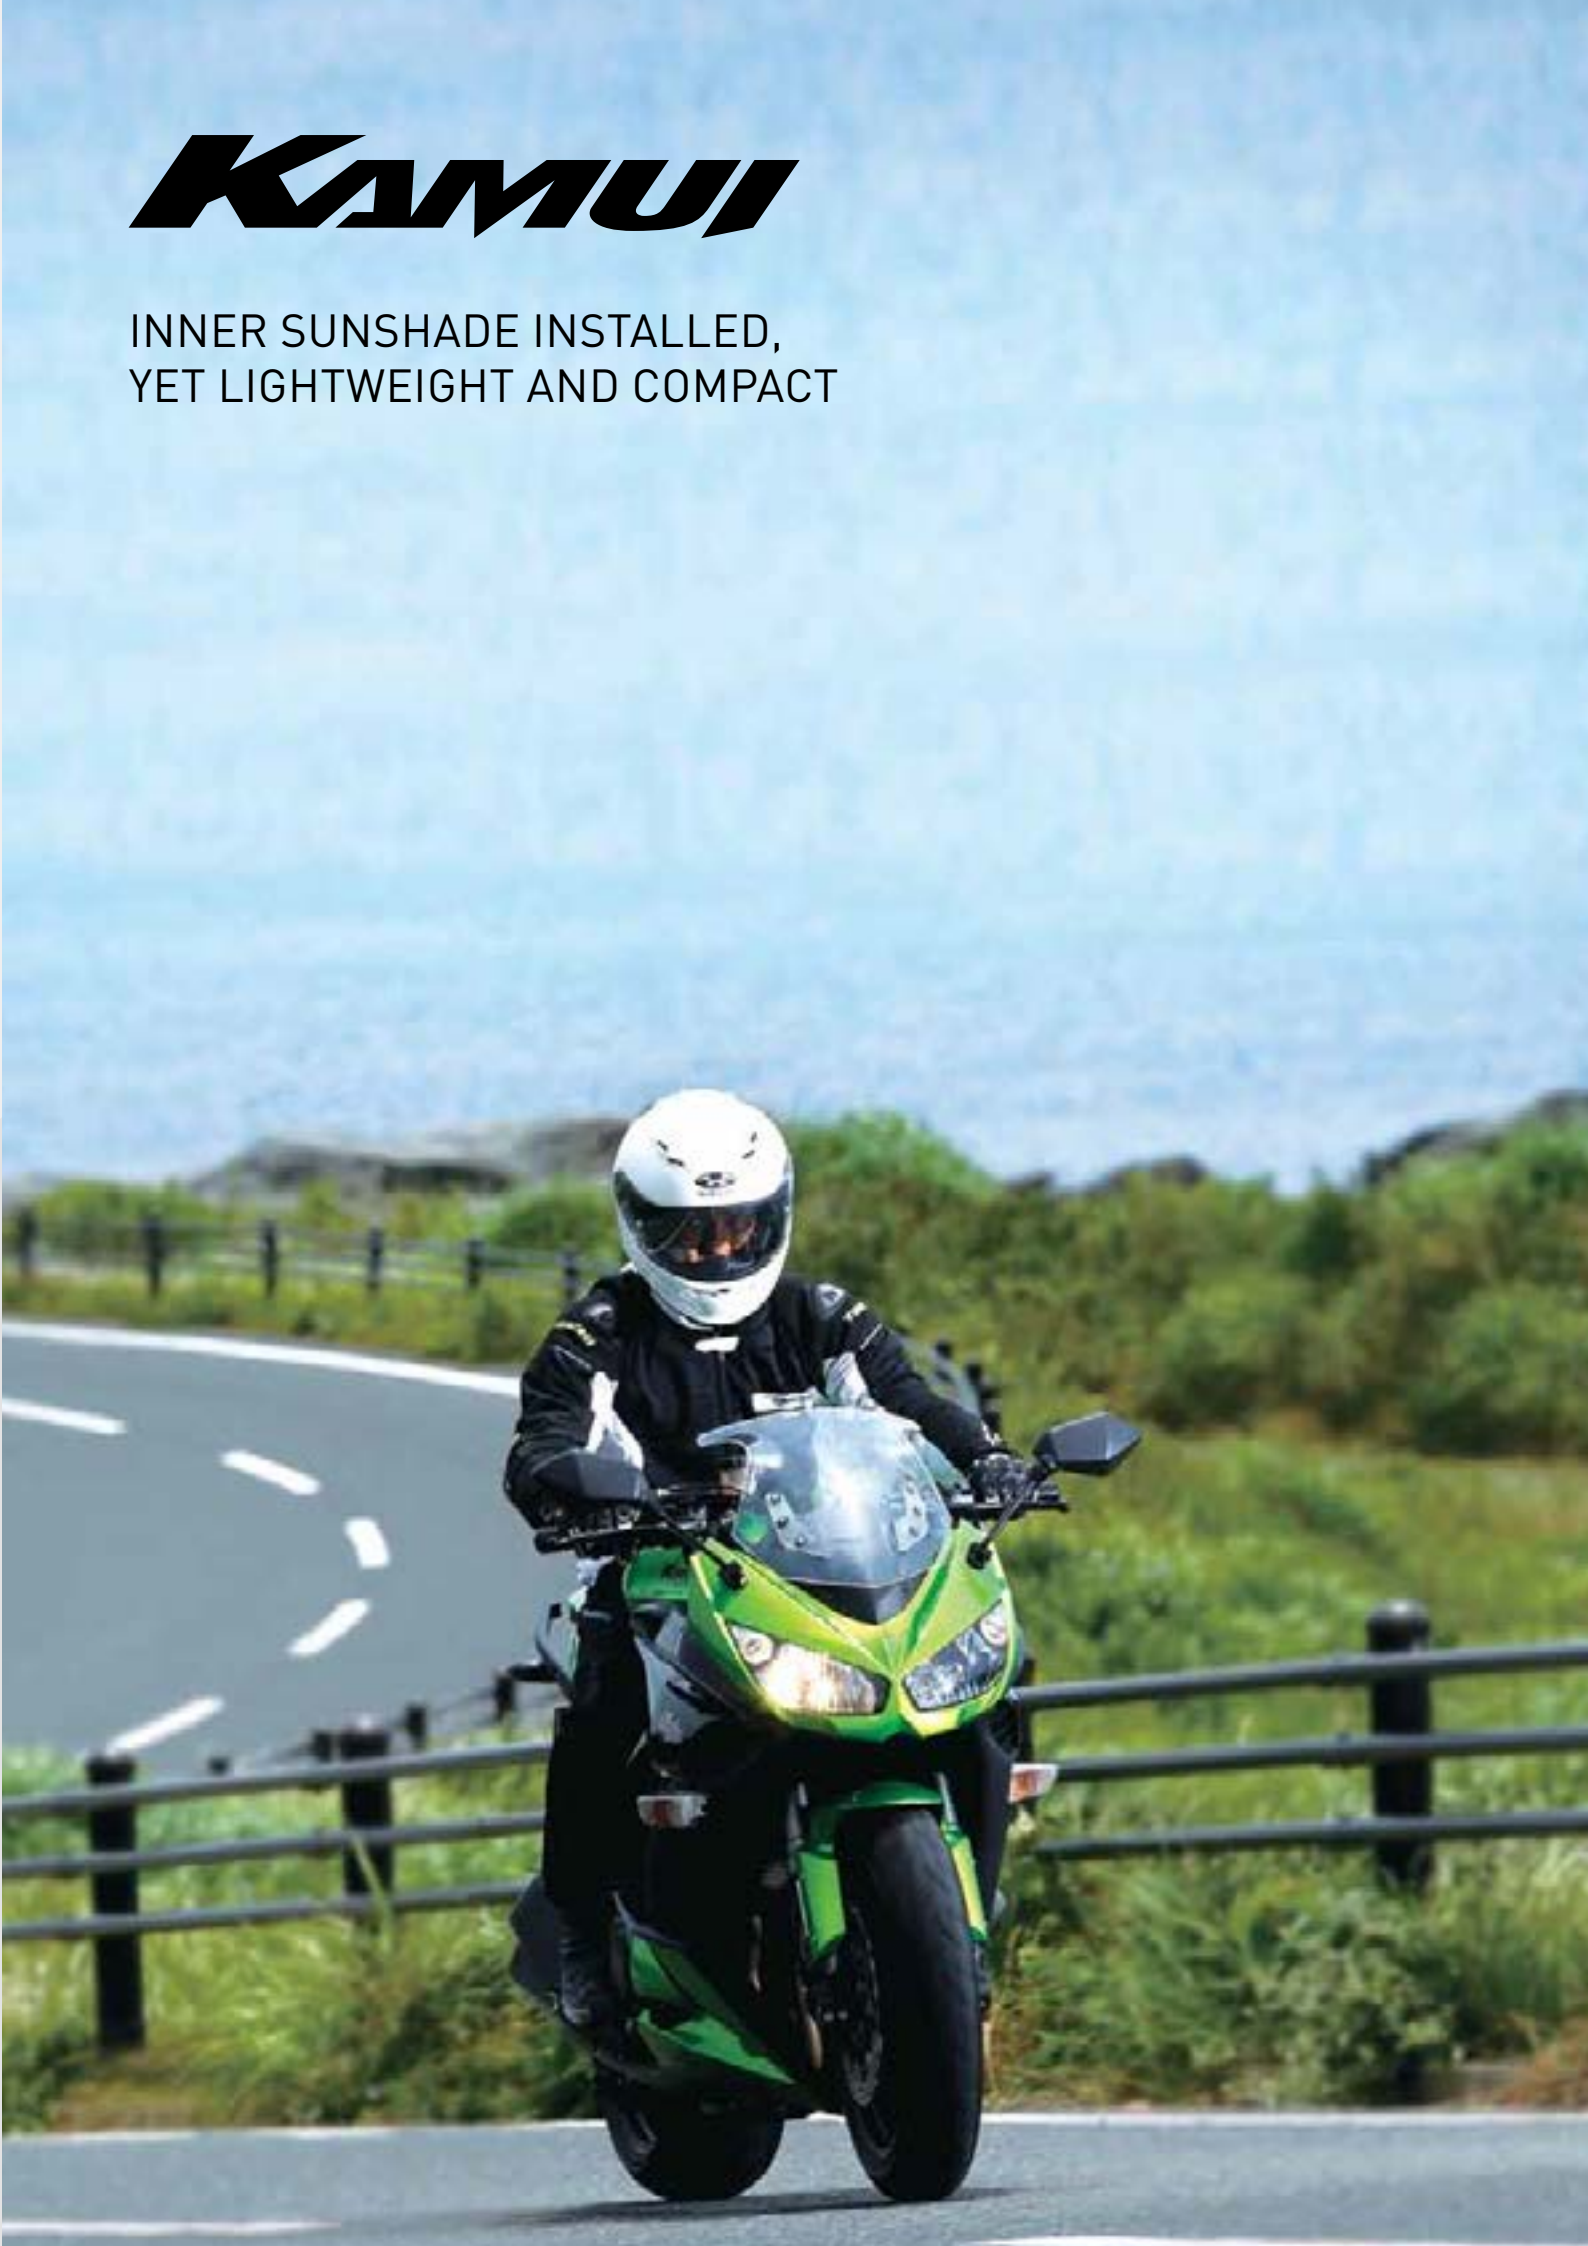
INNER SUNSHADE INSTALLED,
YET LIGHTWEIGHT AND COMPACT



KAMUI

TECHNOLOGY

INNER SUNSHADE

Kabuto's unique system effectively emits the inner humid air through the Side Outlet Trim. (PAT.P) The rubber trim makes it easy to wear and to take off.

INNER SUNSHADE

Kabuto's unique system effectively emits the inner humid air through the Side Outlet Trim. (PAT.P) The rubber trim makes it easy to wear and to take off.

SMOOTH PUT ON/OFF

Kabuto's unique system effectively emits the inner humid air through the Side Outlet Trim. (PAT.P) The rubber trim makes it easy to wear and to take off.

WAKE STABILIZER

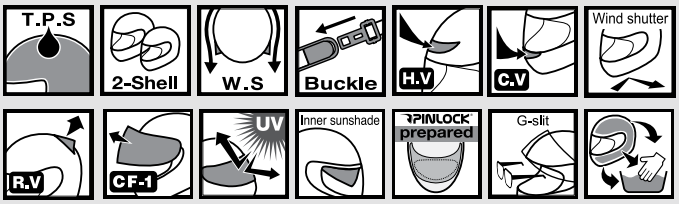
Kabuto's patented system controls airflow around the helmet while riding and decreases the load. Long time studies and wind tunnel experiments improved our own technology.

SHELL

Newly designed rib-formed on its shell enhanced strength and achieved lightweight.

PINLOCK® INSERT LENS VISOR READY

Pinlock® Original Insert Lens helps anti-fogging by keeping the temperature balanced between inside and outside of the helmet in winter and/or rain.



With its integrated inner sun shade, the Kamui is a compact and lightweight sport touring full face helmet. And because it shares its DNA with the FF-5V, the Wake Stabilizer and fully removable and washable COOLMAX interior, is standard.

Aeroblade III

LIGHT WEIGHT AERODYNAMIC FULLFACE HELMET

Developed in a wind tunnel, with lightweight composite construction, and designed for all day comfort, the Aeroblade III is loaded with features. Sharing the same SAF quick-change shield from the FF-5V—with a PINLOCK anti-fog lens insert (not included) — makes riding in any weather as close to fog-free as it gets. When the temperature rises a COOLMAX interior and adjustable ventilation with side outlet trim will keep you cool and is easily removed for cleaning. Patented Wake Stabilizer anti-buffeting technology allows high speed and long distance riding without the fatigue of fighting the wind.

Aerobladelll

TECHNOLOGY

UNIQUE AERO FORM

This impressive form is created by the multi functions. Advanced design and performance are unified on this light weight helmet.

SIDE OUTLET TRIM

Kabuto's unique system effectively emits the inner humid air through the Side Outlet Trim. (PAT.P) The rubber trim makes it easy to wear and to take off.

WAKE STABILIZER

Kabuto's patented system controls airflow around the helmet while riding and decreases the load. Long time studies and wind tunnel experiments improved our own technology.

SAF SHIELD SYSTEM (PAT.P.)

Coverless shield quickly changing system.

ADVANCED COMPOSITE TECHNOLOGY (A.C.T.)

Combination of hyper glass fibre and high-strength organic fibre Dyneema succeeded light weight and improved strength.

FULL DETACHABLE INTERIORS

COOLMAX® material is used for the all area where your skin touches. Interior pads are fully detachable and washable.

RT33

SPORTS/TOURING EXCELLENCE

Combining Kabuto's "ACT EVO/R" shell technology and wind tunnel design, plus a Max Vision face shield with tear off posts, you have the NEW RT-33, Kabuto's latest track-ready sport/touring helmet. The same Wake Stabilizer technology found on all Kabuto helmets, makes it as equally at home on the track as it is on your favourite back road. A fully removable Coolmax interior and SAF-W Max Vision quick change face shield gives you the comfort and ease of maintenance that you expect from Kabuto.

RT33

TECHNOLOGY

ADVANCED COMPOSITE TECHNOLOGY (A.C.T-EVO/R)

Established A.C.T structure has more evolved to "A.C.T -EVO/R" structure

NEWLY DEVELOPED BREATH GUARD

Newly developed bigger dimensioned Breath Guard helps anti-fogging

TOP AERO VENTILATION

Kabuto's Original system, which takes in the front air forcibly and emits hot inner air to the outside and also rectify the air flow. RT-33 has the air route inside the shell through the duct of rear ventilation fin, which gives the excellent ventilation and light weight performance.

WIND SHUTTER NO.2 (CHIN CURTAIN)

Reduce air blowing in from chin area. Detachable depending on a season and purpose

AIR VENTILATIONS

The 3 air ventilations are designed to open and close easily and to take in air and emit the inner humid air effectively

DETACHABLE & WASHABLE INTERIOR PADS

COOLMAX material is used for the all area where your skin touches, interior pads are fully detachable and washable

FOR GLASSES

Cheek pads with slits of glass temples for putting on/off eye wears

SAP-W PINLOCK ORIGINAL INSERT LENS

Pinlock Original Insert Lens prevents fogging (not included)

RT33

- Wake Stabilizer controls the airflow and makes the helmet stable
- Top Air Ventilation System takes in air at a high velocity in through the front and pushes hot inner air to the outside
- Combination carbon, dyneema, Hyper glass fibre and high-strength organic fibre provides a light weight multi-composite shell with increased strength & safety
- Max Vision Shield System includes Pinlock posts (Race Ready)
- Coolmax Removable and Washable Cheek Pads and Interior Liner
- Quick Release Visor
- Removable Breath Guard
- Australian Standard AS/NZS 1698

THE NEW KWALA MX
VISE GRIPS

The Dual Density Kwala Vise grips gives the rider a tacky feel, but also incorporates a more firm feel to ensure the grip pattern holds to rider's glove with the diamond block twist pattern in a low profile.

- Constructed of both firm and soft Custom Kwala rubber compounds
- Outer casing provides diamond contact points with riders glove
- Inner casing provides excellent tackiness and shock absorption
- Available in full diamond block twist pattern only. 122mm wide overall with 105mm hand grip area

Available in

4 COLOURS

Fluro Green, Red, Blue, White.

KWALA GRIP GLUE GEL

KWALA GRIP GLUE GEL has been formulated to give you the best bonding between grip and bars.
10ml tube, enough for 2 pairs of Kwala grips.

SUPER STRENGTH, GEL FORMULA, ANTI DRIP NO MESS.

1. **TO OPEN TUBE :**
   Screw on nozzle firmly. The nozzle will puncture tube.
   Cut nozzle end for you prefered flow rate out of tube.

2. **HOW TO USE :**
   Make sure surfaces are clean and dry. Ideal for other bike part repairs as well.
   Warm new Kwala hand grips in sun for 10 minutes.
   Apply 1/4 (2.5ml) of Kwala Grip glue to the inside flange end of the each grip,
   while squeezing glue tube lightly and rotating grip in your hand to complete
   a full rotation of the grip.
   You need to install each grip immediately after applying glue on the inside of each grip.
   You only have a few minutes to mount as drying is starting.
   Quickly slide grip on to handlebars twisting up the handlebar until completely on.
   Rotate grips when on handlebars 1/4 of a turn back to evenly spread glue on
   inside of grip to handlebar and to the correct rider postion for your preference.
   Kwala Racing holds no responsiblity of incorrect mounting applications to your bike.

3. Wipe of any surplus glue at the flange end of the grip and handlebar.

4. Allow 8 hours to dry for a full cure at room temperature.
   Do not move within drying period for best results.

5. After drying period, make sure grips feel secure and make sure your twist grip
   turns freely. If it is sticking while twisting, remove with a sharp bladed knife.
   We still recommend wiring grips incase of incorrect bonding has happened.

AX5 15W50 20L

SAX5520

Shell Advance AX5 is designed for 4 stroke standard bikes requiring performance specification API SL, JASO MA. It also provides Shell's optimum performance for mopeds, scooters and other small engine bikes.

During the stop-start cycle of commuter journeys, mid-size engines require reliable oil performance under a range of conditions. Shell Advance AX5 is an ideal oil for standard motorbikes thanks to its high oil-performance reliability which helps to protect and clean your engine and prolong its life.

Key features of Shell Advance AX5:

- Proven protection against valve train wear.
- Removal of sludge and engine deposits.
- Special formula keeps oil in-grade for longer.
- Shell Advance's R.C.E* Technology helps your bike perform to its peak potential and respond to your slightest touch.
- *RCE = Reliability of oil-performance, Control, Enjoyable ride.
- Available viscosity grades: SAE J 300 15W-50. All formulations meet: API SL and JASO MA.

SAX7404

Shell Advance AX7 is designed for a 4 stroke bikes requiring performance specification API SL, JASO MA2. It also provides Shell's optimum performance for standard bikes, mopeds, scooters and other small engine bikes.

Shell Advance AX7 is an ideal oil for high-performance motorbikes. Even under stressful conditions, it helps ensure that your engine delivers high power and torque, improving control and comfort and enhancing the excitement and comfort of your ride.

It provides advanced control with smoother gear changes, and a quieter ride thanks to reduced noise and vibration. The excellent oil-performance reliability helps to protect and clean your engine and prolong its life.

Key features of Shell Advance AX7:

- Excellent shear stability – to dampen vibration and reduce noise.
- Proven friction control – for smoother clutch engagement and gear changes.
- Proven protection against valve train wear.
- Removal of sludge and engine deposits.
- Special formula keeps oil in-grade for longer.
- Shell Advance's R.C.E* Technology helps your bike perform to its peak potential and respond to your slightest touch.
- *RCE = Reliability of oil-performance, Control, Enjoyable ride.

Available in viscosity grades: SAE J 300 10W-40 and 15W-50. All formulations meet: API SL and JASO MA2

2-STROKE

SHELL ADVANCE VSX 2

SEMI-SYNTHETIC, 2 STROKE MOTORCYCLE ENGINE OIL

Synthetic based 2-stroke engine oil that offers excellent engine protection and performance compared with mineral engine oils. It is recommended for high performance air and water cooled 2-stroke motorcycle engines.

- Is recommended for high performance air and water
- Is suitable for oil-injection and premix systems.
- Has DPA Technology (Dynamic Performance Additive) response from your bike.
- Offers excellent engine protection, cleanliness and low
- Prevents scuffing, ring sticking and deposit formation.
- Exceeds the international specifications JASO FC, API TC, ISO -L- EGC.

STOCK NO.	PRODUCT
SVX201	VSX2 1Ltr

SHELL HELIX HX3

(MINERAL)

Shell Helix HX3 motor oil is suitable for suitable for standard motorcycles and delivers immediate clean-up action and helps to prevent the build-up of dirt and sludge in older engines. Shell Helix HX3 locks away harmful dirt and deposits, enabling it to get to the engine surfaces, where it works hard to protect engines from wear and helps to prolong engine life.

- Formulated with cleansing agent technology
- Helps to stop dirt and sludge building up and therefore to protect and prolong the life of the engine.
- Oxidation resistance
- Resists oil degradation throughout the oil-change interval.
- Multigrade viscosity
- Easier cold starting compared with monograde oils.
- Higher viscosity
- Helps reduce oil consumption.
- Locking away dirt and deposits

SHELL DEGREASING FLUID

Formulated with low-flammability solvent making it safer, removes all oil and grease-bound dirt, easily removed with water. Recommended for degreasing oil, grease and dirt-covered engines.

STOCK NO.	PRODUCT
SZF020	SHELL DEGREASING FLUID 20 LTR

SHELL SPIRAX GEAR/HYDROLIC OIL

Shell Spirax oils are blended using synthetic base stocks to give optimal performance in a wide variety of automotive axle units subjected to heavy duty conditions.

- Outstanding thermal stability especially in applications where heat, wear and extended drain intervals contribute to severe service.
- High film strength and excellent shear stability.
- Superior low temperature properties promotes oil flow to help protect gears and bearings even at sub-zero temperatures.
- Synthetic formula helps to provide maximum protection over a wide range of temperatures.
- Separates readily from water.
- Approved E500 for Eaton Roadranger 750,000 mile extended warranties with factory fill and service filled 500,000 mile drains.
- Compatible with other MIL-L-2105D or MIL- PRF-2105E quality gear lubricants.

SHELL TELLUS FORK OIL

Premium hydraulic oil for wide temperature ranges, premium performance, anti-wear hydraulic oils which incorporate a special viscosity index improver additive to enhance their viscosity/temperature characteristics.

- Very low viscosity variation with temperature - Special viscosity index technology minimises the oil's variation in viscositywith changes in temperature and provides good pumpability at low temperatures. These features are particularly beneficial in hydraulic applications subjected to extremes of temperature.
- High shear stability - The 'VI' improver type is highly resistant to mechanical stress.
- Outstanding anti-wear performance - Proven anti-wear additives are effective in all operating conditions, including low and severe duty, high load situations.
- Excellent filterability - Minimal tendency to cause filter blockage in the presence of contaminants such as water and calcium.
- Oxidation resistant - Helps resist the formation of acidic products and sludge, even at high working temperatures.
- Corrosion protection - Provides long term protection against corrosion of both ferrous and non-ferrous metals.
- Rapid air release and anti-foam properties - Provide air release without excessive foaming.

COMPANY PROFILE

SHAD was founded in Barcelona in 1992. It is the first Spanish brand that manufactures and distributes top cases for motorcycles. Over the years, it has become the leading company in its market in several countries. The company now has more than 60 wholesalers in the world.

The brand SHAD was created to give a name to the motorcycle accessories that NADSL distributes. NADSL was founded over more than 30 years ago. The main company activity is the manufacture of quality standard seats and top cases for motorcycles. NADSL is the leading European company in manufacturing top cases and seats for the main European manufacturers.

SHAD nace en Barcelona el año 1992 como la primera marca española dedicada a la fabricación y distribución de maletas para motocicletas. A lo largo de los años se ha convertido en líder de mercado en varios países, hasta conseguir tener más de 60 distribuidores en todo el mundo.

La marca SHAD fue creada para dar nombre a los accesorios de motos que distribuye NADSL, empresa fundada hace más de 30 años, cuya actividad principal es la fabricación de sillines y maletas de primera equipación para motocicletas. NADSL, líder europeo en fabricación de maletas, equipa asientos para los principales fabricantes europeos.

SHAD, première marque espagnole consacrée à la fabrication et distribution de top cases pour motos, est née en 1992. Elle est devenue au fil des ans leader sur le marché de plusieurs pays, au point de compter actuellement plus de 60 distributeurs à travers le monde.

La marque SHAD a été créée pour donner un nom aux accessoires de moto distribués par NADSL, entreprise fondée il y a plus de 30 ans, dont l'activité principale consiste à fabriquer des selles et des top cases de premier équipement pour motos. NADSL, leader européen dans la fabrication de top cases, équipe les selles des principaux fabricants européens.

SHAD wurde 1992 als erste spanische Firma für die Herstellung und Vermarktung von Koffern für Motorräder gegründet. Mit den Jahren ist sie zum Marktführer in verschiedenen Ländern geworden und verfügt bereits über mehr als 60 Vertreter weltweit.

SHAD wurde kreiert, um den von NADSL vertriebenen Motorrad-Zubehörteilen einen Namen zu geben. NADSL wurde vor mehr als 30 Jahren gegründet stellt hauptsächlich Sättel und Koffer für die Erstausstattung von Motorrädern her. Als europäischer Marktführer in der Herstellung von Koffern, stattet NADSL Sitzbänke für die wichtigsten europäischen Hersteller aus.

SHAD nasce a Barcellona nell'anno 1992 come la prima marca spagnola dedicata alla fabbricazione e distribuzione di bauletti per motociclette. Durante tutti questi anni si è convertita nel lider del mercato di vari paesi, fino ad ottenere più di 60 distributori in tutto il mondo.

La marca SHAD fu creata per dar il nome agli accessori delle moto che distribuisce NAD SL, ditta fondata più di 30 anni fa, che, principalmente fabbrica sellini e bauletti di prima tenuta per motociclette. NAD SL, lider europeo in fabbricazione di bauletti per i principali fabbricanti europei.

A marca SHAD nasce em Barcelona no ano 1992 como a primeira marca espanhola dedicada à fabricação e distribuição de malas para motociclistas. Ao longo dos anos se converteu em líder de mercado em vários países, alcançando mais de 60 distribuidores no mundo inteiro.

A marca SHAD foi criada para dar nome aos acessórios de motos que distribui a empresa NAD.S.L., fundada há mais de 30 anos tendo como atividade principal a fabricação de bancos e malas para motocicletas. NAD.S.L. é lider europeu em fabricação de malas e montagem dos bancos nas motos das principais montadoras européias.

Includes Padded Laptop Bag

SW18 LAPTOP BAG

LSW018

100% watertight laptop bag made in 420D Nylon double-sided PVC Coating, with PVC watertight zipper and folds on top to secure watertightness.

Removable shock-proof inner compartment, foamed, fully flexible and removable, with mesh pocket and pens compartment, designed to protect your laptop.

It includes an adjustable and removable should strap and it turns into a backpack with padded straps, to be carried comfortably. SW18 includes an injected handle of comfort on the top, a zipped hollowed front pocket and a zipped flat pocket on back.

SW18 is fixed straight to ALL motorcycles thanks to the INCLUDED 4 STRAPS.

Features

- Measures: 40x40x22
- Capacity 18L
- Universal Adaptation
- Attachment Straps
- Waterproof: folds on top
- Waterproof Zip
- Convertible in backpack: padded shoulder straps
- Chest straps
- Inner removable foamed compartment (fully welded)
- Comfort handle

SW38 DUFFLE / REARBAG

LSW038

A welded duffle bag of 100% watertight, made of 420D Nylon double-sided PVC Coating. Fastened with PVC watertight zipper and 3 fold on top to secure watertightness.

It turns into a backpack to be carried comfortably, with padded straps and back cushioned with high density EVA foam, enhancing comfort when the bag is heavily loaded.

SW38 is fixed straight to ALL motorcycles thanks to the INCLUDED 4 STRAPS.

SW22 TANK / BACKPACK

LSW022

A magnet base tank bag 100% waterproof, made of 420D Nylon double-sided PVC Coating. SW22 includes a main compartment with removable watertight pouch, a flat front pocket a removable helmet/accessories carrier attached stylish metal G-shape hook.

SW22 can be turned into a backpack, with removable shoulder straps and back cushioned with high density EVA foam.

SW22 is fixed straight to the motorcycle thanks to magnets and a handlebar strap

SW35 BACKPACK / REAR BAG

LSW035

A holdall bag of 100% watertight, made of 420D Nylon double-sided PVC Coating, fastened with PVC watertight zipper and 3 folds on top to secure the watertightness. It includes a watertight main compartment, a front pocket with zipper and a flat pocket with waterproof zipper. It can easily be carried, thanks to the padded shoulder straps and the back cushioned with high density EVA foam, enhancing comfort when the bag is heavily loaded.

SW35 is fixed straight to ALL motorcycles thanks to the INCLUDED 4 STRAPS.

SW42 SADDLE BAGS

LSW042

Saddlebag 100% watertight , made of 420D Nylon double-sided PVC Coating. Fastened with 3 fold on top to secure watertightness.

It includes a front zipped pocket and an injected handle. Moreover, it includes 2 rigid band to get the sw42 rigid in very easy and quick way.

SW42 is fixed straight to ALL motorcycles thanks to the INCLUDED STRAPS.

SW55 TRAVEL BAG

LSW055

A travel middle side bag perfect for either motorcycle (rear bag) or ATV (front/rear bag), made of 420D Nylon double-sided PVC Coating. SW55 offers a large zipped compartment of 45L, a medium front zipped compartment of 10L and a hanged inside pocket on the top. It also includes 4 compression side belts for 3 different compression areas and 2 belts to store stuffs on top of the front pocket.

It can easily be carried thanks to the foamed shoulder straps, which can be hidden, and back cushioned with high density EVA foam, enhancing ergonomy when the bag is heavily loaded.

SW55 is fixed straight to ALL motorcycles/ATVs thanks to the INCLUDED STRAPS

SW90
WATERPROOF BIG TRAVEL BAG LSW90

A 100% waterproof big travel bag for either motorcycle (rear bag) or ATV (front/rear bag), made of 420D Nylon double-sided PVC Coating. Fastened with PVC watertight zipper and 3 fold on top to secure watertightness. SW90 includes a large breathable and zipped pocket to store all the wet stuff and 5 large compression straps. Moreover, it offers a waterproof valve to get the air out and make it more adjustable.

SW90 can be carried in different ways, thanks to the 2 rubber handles and 2 adjustable shoulder straps cushioned with high density EVA foam, enhancing comfort when the bag is heavily loaded. SW90 is fixed straight to ALL motorcycles/ATVs thanks to the INCLUDED STRAPS.

SB-15
TANK BAG 'GPS' STYLE

LSL015

Optional suction/magnet pads (4pc)
LSL026 / LSL027

With a capacity of 10L, the SB15 is a tank bag with a foldable GPS compartment, with a rigid structure, made in 1680D POLIESTER, a thick and tough material, resistant to abrasion, tearing, and deformation by aging. SB15 includes one strap to embrace the handlebar, 2 buckles straps to fix the motorcycle and 2 suction cups to use instead of the 2 buckles straps, valid for all motorcycles. It is completed a rain cover for rainy days, outer and inner zipped pockets and a shoulder straps.

Features:

- Measures: 33x19x17
- Capacity: 10L
- Universal Adaptation: 2 INCLUDED fitting kit systems:
  - 3 straps: handlebar + 2 buckles straps
  - 1 handlebar strap + 2 suction cups
- Rain Cover INCLUDED
- Shoulder Strap
- Reflective Parts
- GPS Compartment
- Inner/Outer Pockets

SB-25
TANK BAG SPORT

LSL025

Optional suction/magnet pads (4pc)
LSL026 / LSL027

Extendable waterproof tank bag from 20L to 27L, capacity enough for a full-faced helmet. SB25 is bag made with 1680D POLIESTER, a resistant material that stands aging, abrasion and scratches. This bag also includes inner and outer pockets, a rain cover for rainy days and a transparent transparent compartment for tablets, ipads, maps, etc. SB25 is very comfortable, as it can be turned into a backpack. SB25 includes one strap to embrace the handlebar, 2 buckle straps to fix the motorcycle and 2 suction cups to use instead of the 2 buckle straps, valid for all motorcycles.

Features:

- Measures: 40x24x21
- Capacity: 20L-27L
- Universal Adaptation: 2 INCLUDED fitting kit systems:
  - 3 straps: handlebar + 2 buckles straps
  - 1 handlebar strap + 2 suction cups
- Rain Cover INCLUDED
- Convertible into backpack: padded shoulder straps
- Extendable
- Map/Tablet-Ipad Compartment
- Transparent Film for Touch Screen
- Reflective Parts
- Inner/Outer Pockets

SB-80
RIGID RUCKSACK
LSL080

Original rigid rucksack, perfect for motorcycle travelling, with 11 lts capacity. It comes with waterproof zip and short handle.

Features:

- Measures: 18x50x30
- Waterproof zip
- Inner pockets
- Headphones slot
- Max load: 27kg

SC-20
SCOOTER BAG 16L
LSL120

The SC20 quickly and easily attaches to the floorboard of your scooter using velcro and straps. Featuring enough capacity to store a helmet and other items, this is an easy reachable storage compartment with a top loading compartment and two convenient side pockets. A Shoulder strap is included for easy carrying as well as an integrated carrying handle. The SC20 is a universal fit on most scooters and features reflective piping for night time riding visibility.

SC-30
SCOOTER BAG 24L
LSL130

The SC30 quickly and easily attaches to the floorboard of your scooter using velcro and straps. Featuring enough capacity to store a Full Face helmet and other items, this is an easy reachable storage compartment with a top loading compartment and two convenient side pockets. A Shoulder strap is included for easy carrying as well as an integrated carrying handle. The SC30 is a universal fit on most scooters and features reflective piping for night time riding visibility.

VENTURE

H2OUT LADY

Ladies

SPIDI HIGH-END ADVENTURE JACKET FOR TOTAL TOURING: A 3 LAYERS JACKET INCORPORATING THE BEST SPIDI HAS TO OFFER IN TERMS OF COMFORT AND SAFETY FOR THE HARDCORE LADY BIKER TRAVELLERS.

Spidi high-end adventure jacket for total touring: a 3 layers jacket incorporating the best SPIDI has to offer in terms of comfort and safety for the hardcore lady biker travellers.

EXTERNAL SHELL – Tenax polyamide 212gr for sq with Tenax Flex stretches over shoulder blades for easier riding position. Inner mesh liner for sweat dispersion. CE Force Tech protectors kit for shoulders and elbows/forearms. Optional Back protector. Reflex areas. Optional Safety Lamp for night riding. Dynamic vents on sleeves, two vents on shoulders, two rear air vents to increase air circulation. Double windproof zip cover to increase efficiency of H2OUT membrane. Groin straps. 5 pockets (2 waterproof) and 2 waterproof inner pockets. Special streches all along the torso area for increased female fitting.

2ND LAYER – A light H2OUT jacket, removable, with inner pocket and drawstring around the waistline. High collar protects against chilly air and water.

3RD LAYER – Insulating liner with aluminium inserts. Aluminium helps keep the body heat inside with minimal dispersion. With handy stretches around the waistline.

WARRIOR 510

BACK PROTECTOR WARRIOR LINE

INTERNAL CE CERTIFIED BACK PROTECTOR FOR SPIDI JACKETS AND SUITS.

CSARM001

WARRIOR LADY

CSARM005

SAFETY LAB
SPIDI PROTECTION RESEARCH

TECHNICAL FEATURES:

- The structure of Back Warrior Z54 is a multi layered sandwich of materials, the first one of which is stiff and spreads the shock, while the second and third are progressively softer and absorb the energy of impact.
- The cubes shaping the inner and outer surface of Warrior Back are able to absorb an additional 20% of impact energy more than a simple plain surface, all while maintaining a great abrasion resistance.
- The softer inner surface has also been shaped in order to guarantee air circulation thus maintaining comfort, especially in warm climates.
- The peculiar shape and surface structure also make for a greatly flexible and light protector, easily storable, quick to equip and comfortable for every kind of riding position.

WARRIOR CHEST

CHEST PROTECTOR

SPIDI'S EFFORT IN THE SAFETY FIELD BROUGHT THE COMPANY TO CERTIFY A CHEST PROTECTOR, IN FACT SPIDI'S WARRIOR CHEST IS REGULATED AS LEVEL 1 PREN 1621-3 (PROVISIONAL NORM FOR CHEST PROTECTOR FOR MOTORBIKE USAGE).
THE WARRIOR TECHNOLOGY IS COMPOSED BY 3 LAYERS SHAPED AS A SQUARE BLOCKS STRUCTURE DESIGNED TO SPREAD OUT THE SHOCKWAVE.

CSARMO10

TECHNICAL FEATURES:

- 21.8 Kn shock absorbing value (clears prEn 1621-3 test),
- 644 sq/cm area covered by the protector
- Biomechanic junctions are able to adapt to the chest's morphology. This also enables easy folding for storage of protector
- Max thickness is 15mm (guarantees aerodynamics and comfort)
- Great air circulation thanks to wide air vents
- Warrior chest comes built in or optional on most SPIDI jackets and top range leather suits.

BACK WARRIOR EVO

BACK PROTECTOR

SPIDI BACK WARRIOR EVO IS THE TOP PERFORMING AND ERGONOMIC PROTECTOR EVER RELEASED BY SPIDI SAFETY LAB. A HIGH END PRODUCT AT A AFFORDABLE PRICE BORN TO REVOLUTIONIZE THE WORLD OF RIDERS' PROTECTION.

CSARMO11

TECHNICAL FEATURES:

- CE level 2 certification: guarantees top shock absorbing performance
- Global weight of only 520 grams
- Limited thickness (under 30mm) in order to preserve jackets' fitting
- Total ergonomy
- Air ventilation
- Height-adjustable belt, even removable (eg.: in case of racing use)
- Easy to store inside bags, under-saddle space, thanks to it being foldable

NECK WARMER

SPIDI NECK WARMER IS A TACTICAL THERMAL COLLAR, SUITABLE FOR TOURING AND COMMUTING DURING THE COLD SEASON. AFTERMARKET MOTORCYCLE EXHAUST PIPE PARTS

Two Brothers Racing is dedicated to supplying our customers with the best motorcycle aftermarket parts available anywhere. More than just a premium motorcycle pipe, TBR's high-performance racing exhaust systems use our patented V.A.L.E. technology and are available in a variety of styles and mounting positions. From road bikes to MX to ATVs,TBR has the after-market system you need. We carry options for the big four (Yamaha, Kawasaki, Suzuki, and Honda) as well as for BMWs, Hyosungs, Triumphs, Can-Ams and many more. Below you'll find all the information you need to know about the best-designed aftermarket exhaust systems on the market today.

Two Brothers Racing products are designed and sold for racing use only. This product is not legal on public roads, streets, or highways.

EXHAUST LINE-UP

M SERIES CANISTER INFORMATION (ROAD)

The entire line of TBR M Series canisters feature the same high level of quality construction and are designed to be fully service-able in the event of damage (replacement parts are available,please call us), routine maintenance or the occasional repack. Our V.A.L.E.™ (patent pending) slip-on exhaust systems and flange-on systems feature CNC'd aluminum inlets. These special designs provide for ease of maintenance as well as simplified construction, which is what a premium performance product is all about! The exhaust note produced by all of our Top Level™ exhaust systems is best described as being deep and throaty without suffer-ing from the shrill whine normally associated with other manufacturer's straight through muffler canisters.

Filament wound carbon fibre (FWCF)

SILVER SERIES

The all-new Silver Series exhaust is the latest state-of-the-art product from Two Brothers Racing. The new system features carbon fiber highlighted by a natural finished Aluminum inlet and outlet. It's new badge design and famous Two Brothers Racing black Teflon coated magnesium end cap gives it a clean, polished look. With the new Silver Series exhaust, Two Brothers Racing has upped the ante again.

Silver Series Carbon Fiber & Alloy:
All of our carbon parts are made with a high temp aerospace grade epoxy resin. The carbon fabric is made with a 33 million modulus carbon tow then impregnated with the high temperature resin under very tight tolerances. This allows us to make sure that the fabric is impregnated with the exact resin content every time. We then place all of our products in an autoclave to cure. We cure all of our products under full vacuum and apply over a 100 psi for the cure. Using an autoclave allows us to consolidate the material and it also allows us to remove any volatiles from the material. This also includes any air that is trapped in the laminate.

BLACK SERIES

Carbon Fiber & Alloy:
The Black Series from Two Brothers Racing has become a staple among TBR customers who are seeking to unlock the vast potential in their motorcycles. What makes the Black Series so unique? True to its name, the Black Series exhausts are constructed with black Teflon coated cast magnesium end caps, black billet aluminum inlets and outlets, and black canister reinforcement bands. Every little detail has been considered and you get to reap the benefits of that amazing TBR performance and sound.

COMP-S DUAL CHROME & ALUMINUM EXHAUST

Ready to bring your bike into a class of its own? Two Brothers Racing has developed an exhaust system unique enough to compliment the classic styling of the Harley-Davidson. TBR's background in performance is highlighted on this exhaust with horsepower and torque gains. The systems are all handcrafted in the USA with all the TIG welds being perfected by hand.

Part No: 005-4560499D

Harley Davidson (2017) Touring Comp-S Chrome with Aluminum Endcap Dual Slip-On Exhaust.

Comes with all necessary hardware, tubing, instructions for installation.

1. Designed and tuned for max torque and increased horsepower
2. Aluminum end cap
3. All TIG welds done by hand
4. Made in the USA

COMP-S DUAL CHROME & CARBON FIBER EXHAUST

Ready to bring your bike into a class of its own? Two Brothers Racing has developed an exhaust system unique enough to compliment the classic styling of the Harley-Davidson. TBR's background in performance is highlighted on this exhaust with horsepower and torque gains. The systems are all handcrafted in the USA with all the TIG welds being perfected by hand.

Part No: 005-4550499D

Harley Davidson (2017) Touring Comp-S Chrome with Carbon Fiber Dual Slip-On Exhaust.

Comes with all necessary hardware, tubing, instructions for installation.

1. Designed and tuned for max torque and increased horsepower
2. Carbon fiber end cap
3. All TIG welds done by hand
4. Made in the USA

EXHAUST CANISTER MATERIALS

Regardless of sleeve material or shape,all of our canisters perform and sound the same. We manufacture our exhaust systems from different materials to allow you to best match our canister to your bike.

Polished/Brushed Aluminum

Aluminum is a very lightweight and strong material used extensively in the aerospace, automotive, and of course,motorcycle industries. Aluminum is a wise choice due to its excellent strength to weight ratio, corrosion resistance, and clean look. We use lightweight thin-wall .060" extruded 6061 aluminum alloy that is heat treated to a T-6 condition for increased strength, durability, hardness,and finish hold. After the aluminum has been heat treated, it is cut to length and given a brushed satin or polished finish depending on bike application. Ounce for ounce aluminum is the best value of all our M Series mufflers. As a rule our aluminum mufflers weigh about 8.3oz. more than Titanium and Carbon Fiber mufflers.

Carbon Fiber

We have been using Carbon Fiber in motorcycle mufflers since 1992. We are currently the only US Company to exclusively use Filament Wound Carbon Fiber (FWCF) on every carbon fiber muffler we sell. We draw on only the best high temperature resins, and control a proprietary lining system adopted from spacecraft, for additional heat resistance. Our FWCF is continuously wound over a precision machined mandrel for a 100% seamless bond. The FWCF tube is then cured in a high temperature autoclave oven for superior strength and heat resistance. These crucial elements meld to form a precision lightweight muffler that will perform as well as it looks.

Titanium

By weight titanium is one of the world's strongest readily available metals, making it ideal for our M series mufflers. It is 45% lighter than steel with comparable strength, and twice as strong as aluminum while being only 60% heavier. That's right titanium is HEAVIER than aluminum, but since it is twice as strong we are able to use very thin (.024") material to construct our Titanium muffler. The result is a muffler that is about 8.3oz. lighter than our M series aluminum mufflers. Titanium has become an industry standard for motorcycle mufflers due to its durability, corrosion resistance,lightweight, and factory look.

EXHAUST SYSTEM TYPES

Full Systems

This system completely replaces your existing exhaust system. This not only adds horsepower but also can drop significant weight from your bike. We build our header systems as a complete unit. Our finished system flows better at the collectors, makes more power and does not vibrate on the bike.

Our super bike stainless steel headers are manufactured from .035" thin wall stainless steel. We then polish them to a satin finish. The ductile quality of stainless steel makes it possible to produce extremely light and strong headers. We use only premium #304 stainless which will never rust and after a few heat cycles will turn a golden amber color which is the characteristic signature of high quality stainless steel. This type of canister can be mounted in the original position or in a "high" mounted position depending on the bike and our available applications.

Slip-on Systems

This type of system replaces your existing "s-bend" pipe and exhaust canister. Our s-bends are manufactured from .035" thin wall stainless steel. We then polish them to a satin finish. We use only #304 stainless which will never rust.
After a few heat cycles the steel turns a golden amber color which is the characteristic signature of high quality stainless steel.
These systems not only adds horsepower but also can drop significant weight from your bike.
This type of canister can be mounted in the original canister position or in a "high" mounted canister position depending on the bike and our available applications.

Flange-On Exhaust Systems

This canister bolts to your existing exhaust system directly replacing your stock muffler. You retain your original headers and "s-bend" pipe. This configuration not only adds horsepower but also can drop significant weight from your bike. Reinstallation of the stock muffler, should the need ever arise, is very simple. This type of canister can only be mounted in the original canister position regardless of the bike.

OUR PATENTED V.A.L.E™ ATTACHMENT SYSTEM

The X-LiteTM Retaining Ring - the heart of the V.A.L.E. System

V.A.L.E. = Variable Axis Locking Exhaust The V.A.L.E.™ system is our revolutionary and patented method of attaching our muffler canisters to the exhaust tube without the use of springs or welding. Our V.A.L.E. systems allows the muffler assembly - exhaust tube and canister - to be positioned perfectly on the bike before all the mounting hardware is fully tightened. Once the canister and exhaust tubes are properly aligned, the V.A.L.E. assembly locks the muffler canister to the exhaust tube assuring a perfect, leak-free fit.

Two Brothers Racing U.S.A.

AMERICAN-MADE PERFORMANCE

DYNA

Exhaust System:

- Designed and tuned for max torque and increased horsepower
- Swept-up muffler for enhanced ground clearance
- Carbon fiber end cap
- Mandrel bent stainless steel tubing
- All TIG welds done by hand
- High-temp SS wool and packing material
- Fits with forward and mid controls
- Available in brush finish or ceramic black
- Accepts stock O2 sensor

JUICE BOX PRO

- Increase Torque
- Increase Throttle Response
- Works with Any Exhaust System
- Easy Install (OEM spec connectors)
- Pre-Programmed Dynomaps (store up to 10)
- Compatable with Power Commander and Dynojet Maps

Juice Box Pro adds performance

With map storage, computer optional full customization and the ultimate in PC-based tuning capabilities to the proven Juice Box fuel management platform. Two Brothers Racing, continually dedicated to Top Level Performance, dials in Fuel Injection performance like never before with the Juice Box Pro. Offering memory capacity for up to 10 fully custom fuel maps and virtually limitless tuning potential, the Juice Box Pro revolutionizes the plug-and-tune category of performance electronics.

Custom-Designed Fuel Mapping

Juice Box Pro is the only fuel management interface to offer preloaded, dyno tested bike-specific mapping and the ability to fully customize and build your own Power Maps via computer in a simple to- install, user-friendly component.

Through TBR's Direct Injector Control, the fuel circuits on current sport bikes can be modified both richer and leaner than stock as much as -100% to +250% in any particular area of the power spread with the Juice Box Pro. Also, up to 10 pre-programmed TBR Power Maps (custom made and dyno tested for each Two Brothers Racing exhaust system) are adjustable to your preference.

Riders can literally select between a TBR Power Map, custom-built maps, or even fine tune low, mid or high rpm ranges while sitting on the bike and without plugging in to a computer. Standard +/- 10% increments from selected map settings, different ranges are available using the supplied Top Tune software.

Computing Power

For racers and riders looking for the ultimate in precise adjustment and fuel map customization and creation, Two Brothers Racing's Top Tune software allows PC-based Power Map creation at 250-rpm increments and 10 different throttle positions. Modification parameters vary upon make and model of machine and fuel changes made in these increments are automatically interpolated between the rpm and throttle position ranges ensuring a smooth final power curve.

Users can load up to 10 of their personally built Power Maps into the Juice Box Pro and select between them while in the saddle— eliminating the need to "re-boot" with the computer every time a new map is desired.

POWER TIPS

Many municipalities and tracks have begun to implement new, tougher regulations that limit the sound output of street bikes, off-road cycles and ATVs. In the interest of maintaining good relationships between riders and the non-riding community, Two Brothers Racing has developed a series of highly effective sound reducing tips which can help everyone to get along.

REPACK KITS

Two Brothers Racing's unique muffler packing is a crucial performance part. When fresh, it allows your top-level exhaust system to deliver power efficiently while producing the best custom sound from your machine. New packing also ensures your custom exhaust system lasts for years. Every TBR muffler is hand packed with our high quality damping material at our factory, and you can have the same, new-system results every time you service your muffler. Our complete Repack Kits include everything you need to restore your Street, MX, or ATV muffler to factory-fresh performance levels. We recommend replacing the packing after every 10 hours of use for offroad or 000 miles for road applications. Also available is the M2R removal tool for a quick on-bike repack, not necessary but definately makes the job easier.

SHIRTS

Quality fabric is everything. Selectively choosing materials and processes inspired by the 1950's. Two Brothers Racing wears 50/50 blend combed yarn. No shrink, cool dry, and tag-less comfort. Increasing the quality with discharged ink and seamless sides is what you expect from Two Brothers Racing.

FLYDANNAS

The ZANheadgear® Flydanna® speaks for itself - it's what we're known for. Flydannas® are a staple in the motorcycle industry and are essential for keeping the head protected from the elements. Wear our headwraps comfortably under your helmet to keep the sweat out of your eyes and your helmet liner clean. Flydannas® are also great to wear while fishing, hunting, boating or playing at the beach.

NEODANNAS
ALL-WEATHER

Wind & water resistant neoprene. Adjustable Velcro® closure. Reversible to solid black. Reinforced stretch nylon piping around edges for longevity Ideal for use under helmets & goggles. One size fits most.

SOLID BLACK
CBNDO10

The Neodanna is a revolutionary item with multiple features. Our 100% cotton bandanna is combined with a neoprene face mask to ensure full coverage of the face and neck, providing a comfortable light-weight fit. The neoprene section covers the cheeks, nose & mouth, while the bandanna is easily adjusted with a Velcro® closure. Ideal for wind and dust protection in both warm and cold weather settings.

WINDBREAKER
CBNDO13

The Windbreaker Neodanna® is a patented design exclusive to ZAN Headgear®. We integrated a comfortable, warm and durable Neoprene face mask with fleece lined windbreaker material for extra wind protection. Great for cold weather. Easily adjusts with a Velcro closure. Reversible.
